iPhone Programming for Minimizing Online Access

	Action Title	Description & Instructions
1	**Open Settings**	On your Home Screen, locate and tap the **Settings** app icon (gear icon) to open system preferences.
2	**Access Screen Time**	Scroll down through the main Settings menu and select **Screen Time**.
3	**Open Content & Privacy Restrictions**	Under the *Restrictions* section, tap **Content & Privacy Restrictions**.
4	**Enable & Overview Menu**	Ensure the main toggle at the top is turned **ON** (green switch). This unlocks detailed privacy and app control options.
5	**iTunes & App Store Purchases**	Select **iTunes & App Store Purchases** to set permissions for installing apps, deleting apps, and making in-app purchases. Ensure that **Don't Allow** is selected for **Installing Apps and In-app Purchases**. Ensure that **Always Require** is selected for **Require Password.**
6	**Allowed Apps & Features**	Select **Allowed Apps & Features** to toggle access on or off for built-in iOS apps (e.g., Safari, Mail, Camera, Wallet). Toggle **Safari** to off.
7	**App Store, Media, Web & Games**	Select **App Store, Media, Web, & Games** to configure content rating limits for movies, TV, web content, and Game Center restrictions. Select **Clean** for **Music, Podcasts, News, Fitness and Books.**. Select **Off** for **Music Videos and Music Profiles.** Select **PG-13** for **Movies.** Select **TV-PG** for **Shows.** Select **Only Approved Websites** for **Web Content.** **Select 18+ for Apps.**
