Part 3:
Treatment

David S. Prescott, MSW, LCSW, LICSW, ATSA-F

At the Core…

- Assessment-driven
- Strong case formulation, including role of trauma
- Strengths-based
- Cognitive-behavioral
- Skills enactment
- Collaborative
- Eliciting internal motivation

TREATMENT

Stable, **O**ccupied, **A**ccountable, **P**lan (SOAP)

- Cognitive-Behavioral Treatment

- Risk Management

- Plan for Building a Better Life

Typical Sequence

- Addressing treatment-interfering factors
- Facing up to and discussing abuse
- Understanding circumstances and processes in need of self-management and self-regulation
- Rehearsing/implementing new skills
- Making amends

Flow

Gratitude

Tony Ward

Pamela Yates

Gratitude

Tyffani Dent
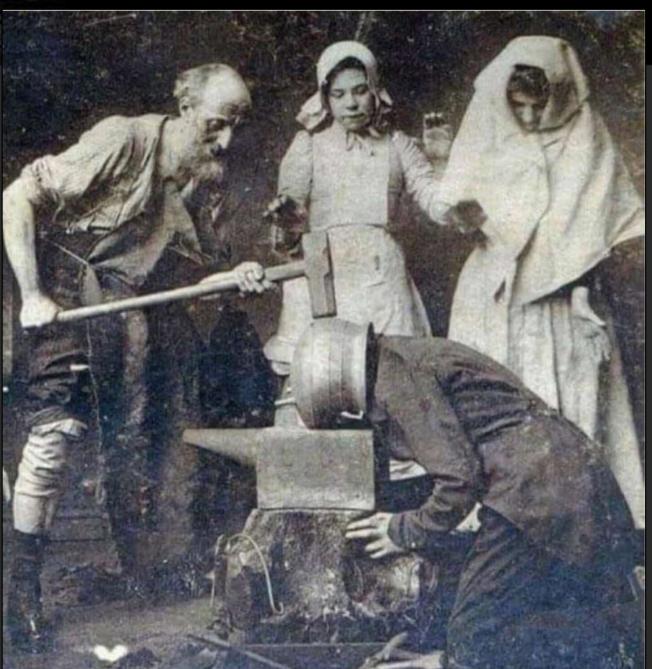

Mayumi Purvis

Historical Context

• 1895-1985

- Smith et al. (2002) meta analysis of 117 studies; $N = 442{,}471$
- **No form of punishment reduced reoffence risk**
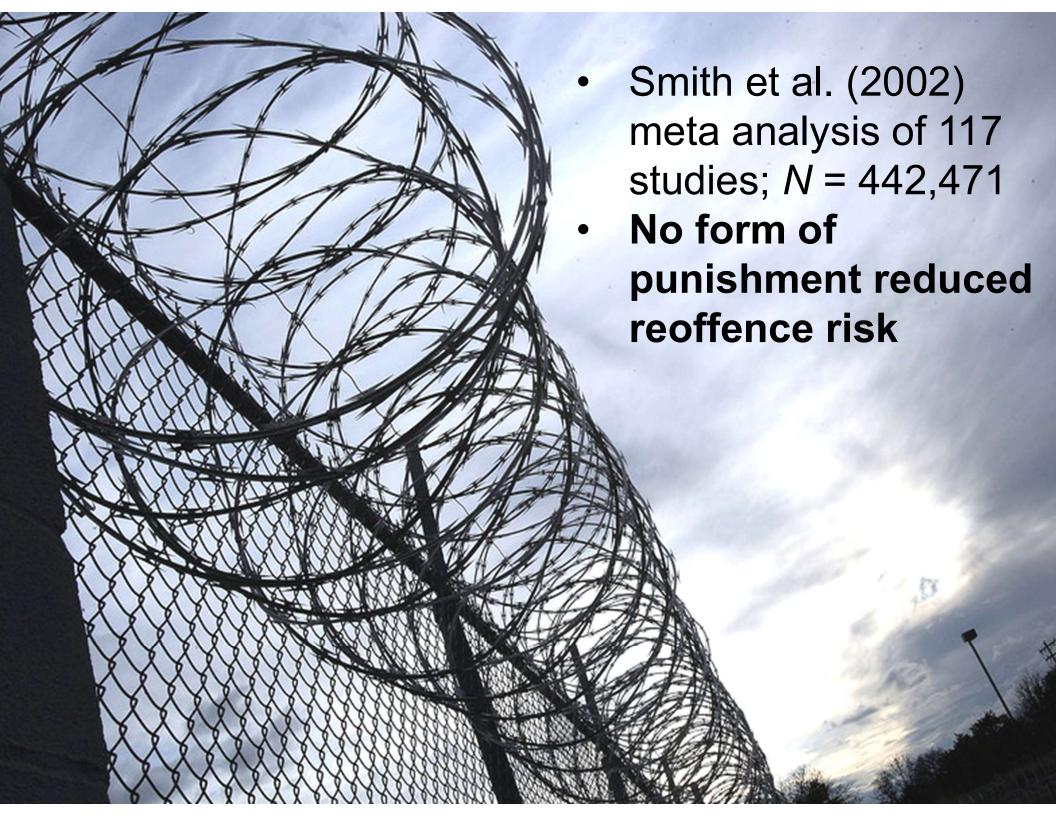

Ultimately

- By the most rigorous/conservative standards:
1. Punishment doesn't reduce risk
   - Punishment = punishment
2. Treatment <u>can</u> work
3. Treatment can be better with the right community supervision

Female inmates sterilized in California prisons without approval

By Corey G. Johnson
The Center for Investigative Reporting

Published: Sunday, Jul. 7, 2013 - 12:00 am | Page 1A
Last Modified: Sunday, Jul. 7, 2013 - 8:24 am

Doctors under contract with the California Department of Corrections and Rehabilitation sterilized nearly 150 female inmates from 2006 to 2010 without required state approvals, the Center for Investigative Reporting has found.

At least 148 women received tubal ligations in violation of prison rules during those five years –

PHOTOS

Noah Berger For the Center for Investigative Reporting

Crystal Nguyen, a former inmate at Valley State Prison seen with son Neiko Nguyen, said she worked in the prison infirmary. She said she often heard the medical staff ask repeat offenders to agree to be sterilized. "I was

Questions

- What are the forces that turn medical care into coercive action?
  - What attitudes?
  - What beliefs?
  - Where was the Hippocratic Oath of "do no harm?
  - Under what conditions do people acquiesce to those who have more power?

- Can the right policies, models, and frameworks prevent this kind of horror?
  - Collaborative treatment?
  - Methods for including the service user's voice?

Newsweek

THE U.S. EMBASSY BOMBINGS

Gay for Life?

Going Straight: The Uproar Over Sexual 'Conversion'
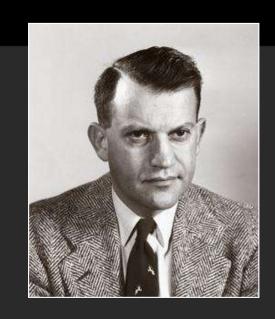

Questions

- Under what conditions is it acceptable to "change" any part of someone's sexuality?
    - When do we know that treatment is with or against their will?

- We likely can't change what someone wants

- We can change how someone behaves around what they want

- Collaboration and the therapeutic alliance are key
    - Service user voice is critical throughout treatment

1979: Edward S. Bordin

- Therapeutic alliance:
  - Agreement on relationship
  - Agreement on goals
  - Agreement on tasks
  - (Norcross, 2002, would add client preferences)

  - Over 1,100 studies have emphasized the importance of the alliance in psychotherapy since (Orlinsky et al., 1994)

Vermont's Successful Sexual Offender Program Is Undergoing Big Changes
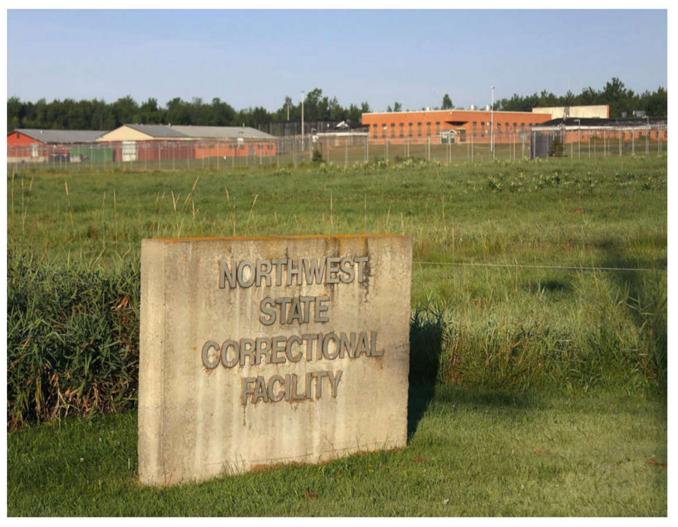

By CHARLOTTE ALBRIGHT • AUG 3, 2015

Vermont's Corrections Department is moving its program for sexual offenders to the Northwest Correctional Center in St. Albans and none of the program's previous therapists are coming with it.

Scripted Manualization:
Never the complete treatment program

- The menu is not the meal

Cognitive Behavioral Interventions for Sexual Offending

Sessions

Pretreatment
- Exploring Reasons People Resist
- Rethinking Resistance
- Weighing the Pros and Cons

Module 1
- Introducing the Curriculum
- Clarifying Values
- Setting a Goal
- Weighing the Costs and Benefits
- Social Skill – Reflective Listening
- Social Skill – Giving Feedback
- Developing Emergency Strategies
- Developing Emergency Strategies (Continued)

Module 2
- Introducing the Behavior Chain
- Understanding Life History and Lifestyle Factors

- **Module 4 (Continued)**
  - Using Self-Control
  - Dealing with Negative/Stressful Life Events
  - Dealing with Anger
  - Dealing with Hostility
  - Dealing with Rejection and Failure
  - Dealing with Anxiety/Fear

- **Module 5**
  - Asking for Help
  - Taking the Perspective of Others
  - Dealing with Mixed Messages
  - Dealing with Criticism
  - Resolving Conflict
  - Avoiding Trouble with Others
  - Asking Permission
  - Disclosing Personal Information
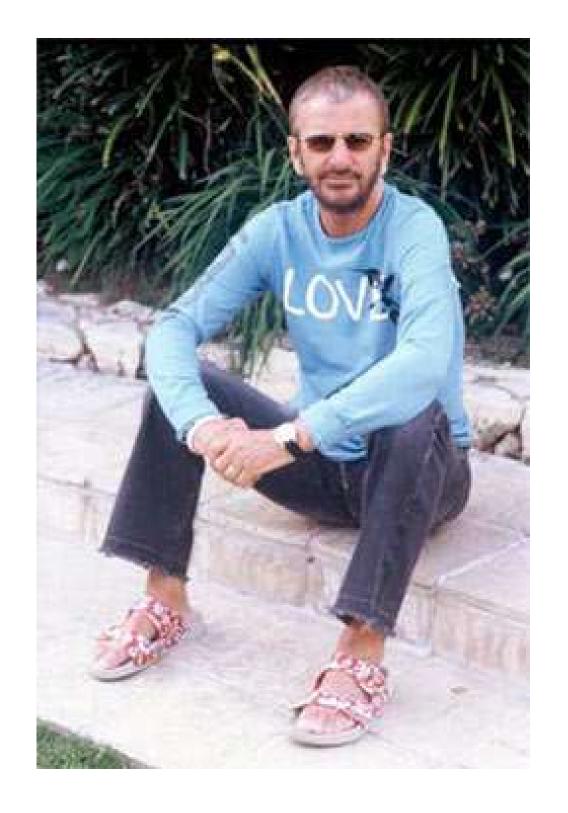

One US State's Solution

- Brief, highly scripted treatment in prison
- Good Lives treatment introduction near the end of incarceration
- Good Lives Model in community
  - In collaboration with probation officers

Ideally
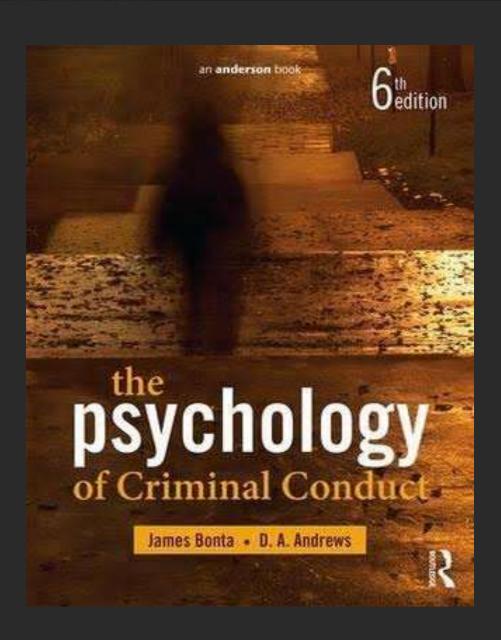

Treatment Context

Treatment context:
What works?

RNR:
Core Aims and Assumptions

- Primary aim of correctional intervention is to reduce harm inflicted on community

- Most important treatment targets are those empirically associated with reduced recidivism rates

- Clients should be treated humanely, with research and treatment delivered in an ethically responsible manner

- Client rights trumped only by community needs

Bonta & Andrews (2017)

Treatment context: What works?

- **Risk:** Match level of services to level of risk
- **Need:** Target dynamic risk factors/criminogenic needs
- **Responsivity:** Use empirically supported approaches; also *specific* responsivity

Dynamic risk factors (criminogenic needs)

- Antisocial personality pattern
- Antisocial cognitions
- Antisocial (and/or lack of prosocial) social influences
- General self-regulation difficulties
- Emotional identification with children
- Poor sexual self-regulation
- Offense related sexual interest/preference

(e.g., Andrews & Bonta, 2010, Hanson & Morton-Bourgon, 2005)

Treatment context: What works?

- **Risk:** Match level of services to level of risk
- **Need:** Target dynamic risk factors/criminogenic needs
- **Responsivity:** Use empirically supported approaches; also *specific* responsivity

Hot off the press…

Exploring Risk for Sexual Recidivism and Treatment Responsivity Through the Lens of Early Trauma

Gwenda M. Willis, PhD[1] iD and Jill S. Levenson, PhD[2]

Effectiveness of sexual offending treatment

CrossMark

"Perhaps therapy will be more effective if we keep in mind that...[our] clients are more similar to other therapy clients than are different. Treatment something we do to clients rather a collaborative (Levenson & Prescott,

"Research on the effectiveness of individual level interventions for preventing sexual offending and reoffending against children remains inconclusive" (p. 5)

Abstract

[b] Department of Psychology, University of Saskatchewan, Canada

Treatment associated with 32.6% reduction in sexual reoffending (9.5% treated, 14.1% untreated)

Turf Wars

Myths and Misunderstandings

- Academic arguments about RNR "versus" GLM
- RNR = <u>principles</u>; GLM = a rehabilitation <u>model/practice framework</u> (see Ward & Durrant, 2021)
- RNR has excellent research
  - Although in our experience, responsivity is often poorly defined
- GLM principles have an excellent underlying research base
- GLM applied properly adheres to the RNR principles
- GLM can be a way to "do" RNR; there are other ways
- In actual treatment, there is no "versus"

One Administrative Perspective

1. Assess and classify clients according to <u>risk</u>

2. Assess treatment <u>needs</u>

3. Assess protective factors

4. Conduct comprehensive assessment to develop understanding of specific <u>responsivity</u>

5. Develop understanding of the narrative underlying risks, needs, and responsivity factors

6. Formulate initial hypotheses about how risk/need factors map onto the Good Lives Model goals that we will explore in depth

Turf Wars

What *else* works to prevent reoffending?

- Common factors of effective psychotherapy (e.g., Marshall, 2005; Marshall et al., 2002)

- Comprehensive re-entry planning (e.g., Willis & Grace, 2008, 2009)

- Cognitive transformation (e.g., Maruna, 2001)

- Achieving informal social control (e.g., Sampson & Laub, 1993)

The Good Lives Model (GLM)

"…[our clients] want better lives, not simply the promise of less harmful ones"
(Ward et al., 2007)

"As a kid I had lots of examples of what I didn't want to be. I spent my life trying not to be those things. Then when an aide asked me about 5 years ago what I wanted to be I had no idea."

40 y/o male
in civil commitment (USA)

Reflection Exercise

- Take three deep breaths. Take a moment to think about what a Good Life means to you.

- If it helps, close your eyes and think about what was happening the last time you remember feeling truly satisfied and fulfilled in your life. Try to *see* fulfilment. Try to *hear* fulfilment. Try to *taste* fulfilment. Try to *smell* fulfilment. Try to *feel* fulfilment.

- Take some notes.

We will revisit this exercise later.
You will not be expected to share your responses.

Going Upstream

- What is something (anything) that you would like right now?
    - World peace? A Tesla?
    - If you had that, then what else would you have in your life?
    - And if you had that, what else would you have in your life?
    - And if you had that, what else would you have in your life?
    - Keep going until your answer is one word and you can't go further
    - What have you learned?

What are all the needs that these meet?

Krakow

- Lord's Ark Church
- Built by hand from ruins caused by Soviet invasion
- What needs was this meeting?

GLM Approach

- Strengths-based, positive approach
- Collaborative, motivational approach
- Focuses on how treatment/supervision/case management will benefit client
- Two goals:
  - Reducing/managing risk
  - Attaining fulfilling life, psychological wellbeing
- GLM integrated with RNR

GLM Approach

- Offending relates to the pursuit of legitimate goals via harmful, maladaptive means
- All human beings are goal-directed and predisposed to seek *primary human goods*
- Primary human goods = actions, experiences, circumstances, states of being, etc., that individuals seek to attain for their own sake

GLM Approach

- Secondary goods = concrete ways (means) to secure primary goods (also called instrumental goods)

- Dynamic risk factors = markers for internal or external obstacles that block achieving primary goods in prosocial ways in addition to increasing risk

A note on narrative

- We often think in terms of risk and protective "factors"

- Problem of reification

- Ward and his colleagues (including us) encourage thinking in terms of the narrative that underlies the factors

- What's the actual story?

- How did events result in this "factor"?

Primary Human Goods

- GLM proposes at least 10 primary human goods

- Value/importance placed on various goods determines individual's conceptualisation of a "good life"; reflected in good life plan (GLP)

- Assumption: Prosocial attainment of goods will help reduce or manage risk to reoffend (alongside targeting criminogenic needs)

Primary Human Goods
as Common Life Goals
(Yates & Prescott, 2011)

Primary Good	→	**Common Life Goal**
Life	→	Life: Living and Surviving
Knowledge	→	Knowledge: Learning and Knowing
Excellence in Work & Play	→	Being Good at Work & Play
Excellence in Agency	→	Personal Choice and Independence
Inner Peace	→	Peace of Mind
Friendship/Relatedness	→	Relationships and Friendships
Community	→	Community: Being Part of a Group
Spirituality	→	Spirituality: Having Meaning in Life
Happiness	→	Happiness
Creativity	→	Creativity

GLM vs. Andrews & Bonta Big 8
(possible comparison)

GLM

- Happiness/Pleasure
- Creativity
- Knowledge
- Being good at work and play
- Personal choice/independence
- Relationships and friendships
- Meaning and purpose in life
- Peace of mind
- Community
- Living and surviving

Big 8

- Substance abuse and other pleasure seeking
- Poor performance in school or work
- Impulsivity/self-regulation deficits
- Antisocial peer group/social isolation/family problems
- Antisocial history
- Aggression/irritability
- Attitudes and beliefs supportive of sexual violence
- Alcohol/drugs, reckless, dangerous behavior

Good Life Goals
(Prescott, 2018; Also Print, 2013)

- Having fun
- Being an achiever
- Being my own person
- Being connected to other people
- Having a purpose in life
- Meeting my emotional needs
- Meeting my sexual needs
- Being physically healthy

GLM vs. Andrews & Bonta Big 8
(possible comparison)

- Having fun

- Being an achiever

- Being my own person

- Being connected to other people

- Having a purpose in life

- Meeting my emotional needs

- Meeting my sexual needs

- Being physically healthy

- Substance abuse and other pleasure seeking

- Poor performance in school or work

- Impulsivity/self-regulation deficits

- Antisocial peer group/social isolation/family problems

- Antisocial history

- Aggression/irritability

- Attitudes and beliefs supportive of sexual violence

- Alcohol/drugs, reckless, dangerous behavior

Thinking on these goals

- What will progress in this look like to me and others?

- What can I do to make positive changes in this?

- What problems might happen as I try to improve?

- How would I know when things aren't working?

- How would others know when things aren't working?

- What can I and others do when things start to go wrong?

- How can I and others acknowledge progress when it happens?

Thinking Further On These Goals

- How have traumatic and otherwise adverse experiences affected this person's ability to get this goal?

- How have the same experiences affected how he looks at the world?

- Where are all the places that this person may experience ambivalence about this goal?

- How can we elicit the client's internal motivation(s) regarding attaining this goal without harming others?

Primary Goods: Definitions

- Life: Living & Surviving
  - Healthy living and functioning
  - Basic survival needs

- Instrumental (secondary) goods:
  - Acquiring income for food/shelter
  - Physical activity
  - Healthy nutrition
  - Health care

Primary Goods: Definitions

- Knowledge: Learning & Knowing
  - Desire for information and understanding about oneself and the world

- Instrumental (secondary) goods:
  - Attending school, training, vocational courses
  - Self-study
  - Therapy and self-help activities

Primary Goods: Definitions
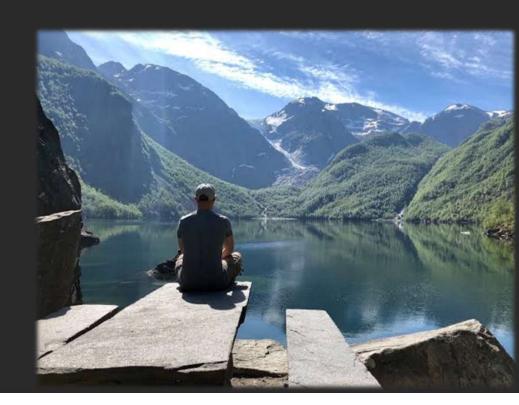

- Being Good at Play / Being Good and Work
  - Mastery in work / leisure

- Instrumental (secondary) goods:
  - Participation in sport or other leisure activities/hobbies
  - Participation in training, certification, apprenticeships
  - Meaningful paid or voluntary work

Primary Goods: Definitions

- Personal Choice and Independence
  - Desire for independence, autonomy, choice, self-directedness

- Instrumental (secondary) goods:
  - Formulate plans to achieve a specific end or objective
  - Engage in activities to ensure self-sufficiency
  - Assert self; communicate needs and desires with others
  - Control, dominate, abuse or manipulate others to establish personal control

Primary Goods: Definitions

- Peace of Mind
  - Emotion regulation, equilibrium
  - Freedom from emotional turmoil and stress

- Instrumental (secondary) goods:
  - Activities to minimize emotional distress/achieve equilibrium (e.g., exercise, meditation)
  - Substance use or sexual activity to regulate mood/cope

Primary Goods: Definitions

- Relationships and Friendships
  - Desire to establish bonds with others; includes intimate, romantic and family relationships

- Instrumental (secondary) goods:
  - Activities that facilitate meeting new people and maintaining relationships
  - Spending time with friends
  - Giving and receiving support (e.g., emotional, practical)
  - Intimate relationships

Primary Goods: Definitions

- Community: Being Part of a Group
  - Desire to be connected to similar social groups

- Instrumental (secondary) goods:
  - Participate in community activities (e.g., social service groups, special interest groups)
  - Participate in volunteer activities, groups
  - Membership in groups sharing common interests, values, concerns
  - Provide practical assistance to others in times of need (e.g., neighbors)

Primary Goods: Definitions

- Spirituality: Having Meaning in Life
  - Desire for meaning and purpose in life
  - Sense that one is part of larger whole

- Instrumental (secondary) goods:
  - Attends formal religious/spiritual events (e.g., church)
  - Meditation/prayer
  - Involved in spiritual community/group
  - Mindfulness
  - Forest bathing

Primary Goods: Definitions

- Creativity
  - Desire for novelty or innovation

- Instrumental (secondary) goods:
  - Engages in new/novel experiences that has not attempted previously
  - Engages in artistic, creative activities
  - Desire/need for novel sexual practices

Primary Goods: Definitions

- Happiness
  - State of being happy/content
  - Pleasure in life
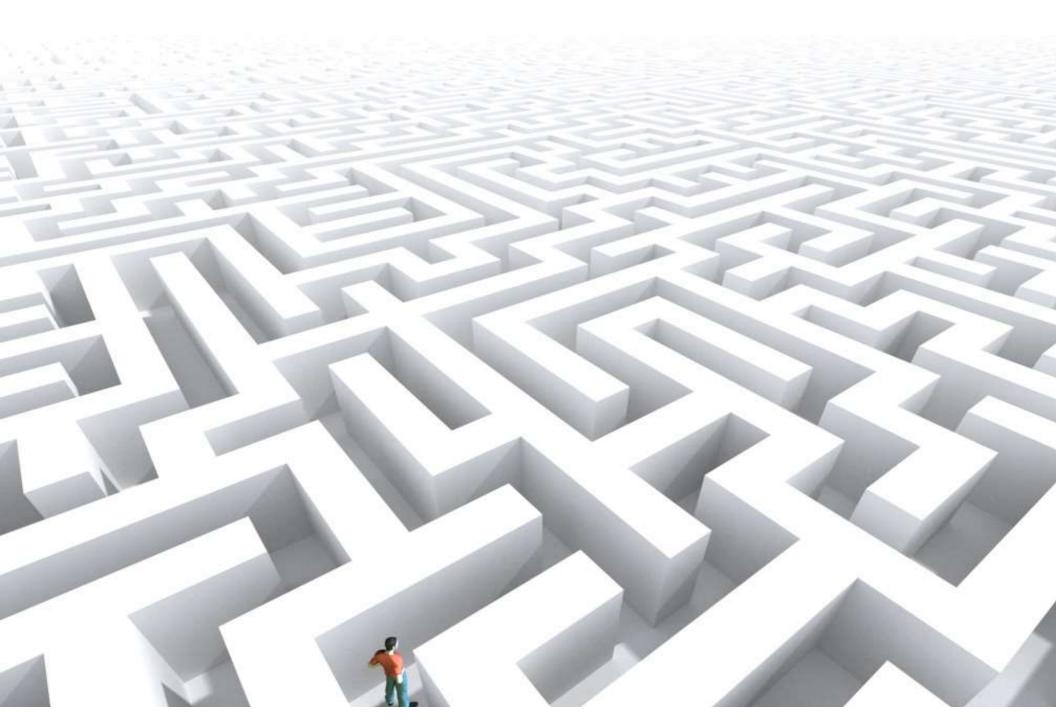

- Instrumental (secondary) goods:
  - Activities that result in sense of satisfaction, contentment, fulfillment
  - Activities that result in sense of pleasure (e.g., leisure activities, sports, sex)
  - Activities intended to achieve sense of purpose, direction in life (e.g., work, friendships, family)

What are your prioritised primary human goods?

Good Life Plan

When Things Go Wrong: Good Life Plan Obstacles

The GLM proposes that offending and life problems result when…

1. Maladaptive/harmful means used to seek out primary goods

2. A Good Life Plan lacks scope

3. Conflict between goods and/or means

4. Lack of capacity to attain goods in a prosocial/adaptive way (internal and external)

A quick note…

- "Obstacles" are referred to in earlier texts as "flaws"
- "Flaws" can sometimes have a negative connotation ("flawed human being") even though the original intention was different (e.g., the flaws in leather or diamonds can give them their special character)
- English is a living language where connotations can change ☺
- "Obstacles" might just as easily be "challenges", although that word is also subject to misuse ("challenged to a fight")

GLM Practice Implications

Exercise on Identifying Strengths

Start with Strengths

Strengths

- CASE SUMMARY C
- Dan, 16.5, entered residential treatment after he molested his two younger siblings, one male and one female. He also physically assaulted his mother, which has led to long-term concerns as to whether he can return home. Dan hates treatment and complains that he should have access to a grand piano, because his treatment is interfering with his future career as a musician. Dan has intense difficulty getting along with others and often views them as stupid.

Strengths

- CASE SUMMARY D

- Dan is almost 17. He is very serious about his future as a classical music composer. However, he has great difficulty getting along with others. He wants desperately to have friends. His growing up in a house where he was beaten by his father (before his father became incarcerated) has left him with a belief that he has to fight to get even. Curious about sex and wanting to feel like a man, he molested his younger brother and sister, and physically assaulted his mother when he realized she was going to have him placed outside of her home. Dan wants nothing more than to find his way out of his circumstances, and that means getting a solid musical education and practicing piano.

Find the strength

Find the strength

Find the strength

Find the strength

Find the strength

Find the strength

Find the strength

LET'S GO DEEPER

Consider…

- Competence

- Autonomy

- Connection

- Meaning and Purpose

- Happiness and Pleasure

- Can you see the ambivalence?

- The difference between where he is and where he wants to be?

Consider…

- Competence

- Autonomy

- Connection

- Meaning and Purpose

- Happiness and Pleasure

- Can you see the ambivalence?

- The difference between where he is and where he wants to be?

Meet your clients
where they DREAM

Always Meet your Clients Where they Dream

LET'S GO WIDER

Find the Strength

Hint

- Autonomy?
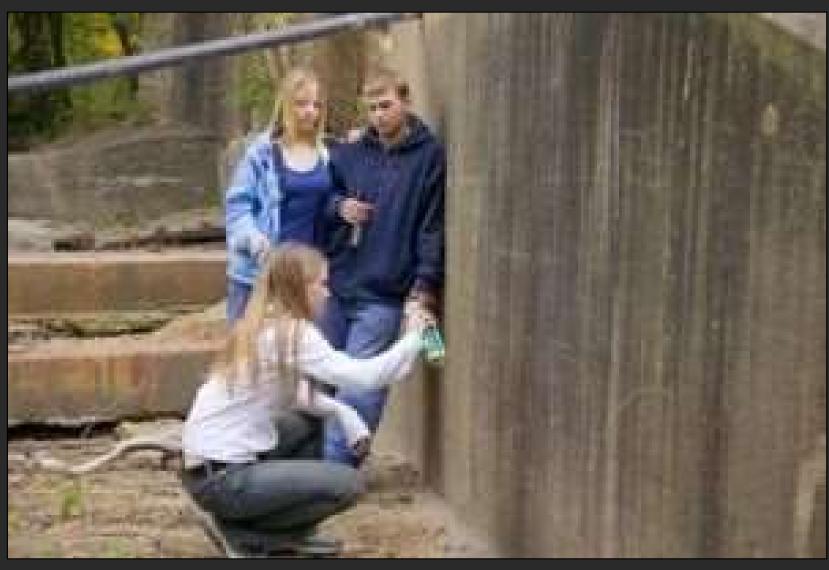

- Connection?

- Creativity?

- Competence?

Find the Strength

Hint

- Autonomy?
- Connection?
- Creativity (in the sense of novelty seeking)?
- Happiness and Pleasure?

Find the Strength

- Autonomy?
- Connection?
- Life?

- What is the difference between where he is and where he wants to be?

Find the Strength

Hint

- Autonomy?
- Connection?
- Life?
- Happiness/Pleasure?

Hint

- Autonomy?
- Connection?
- Life?
- Happiness/Pleasure?

- What's the difference between where he is and where he wants to be?

Question

- Am I the only one picking up themes of trauma and other adverse experiences?

Assessment tasks

- RNR-based assessment
  - Includes static/dynamic risk and specific responsivity factors (e.g., developmental disability, mental health, substance abuse, etc.)

- Exploration of good life plan (at time of offending and now)
  - Identify valued primary goods and goods implicated in offending
  - Identify past and current means used to attain valued primary goods
  - Identify any concerns re: scope, conflict and capacity

- Exploration of protective factors

E.g., Willis, Yates, Gannon, & Ward (2013); Yates, Prescott, & Ward (2010)

Identifying Primary Goods/ Common Life Goals

- Clinical exercise

- Determine those things (i.e., activities, situations, experiences) that are important to the individual in their life

  - Infer primary goods

- Detect goals evident in offense-related actions and general life functioning

  - Infer primary goods implicated in offending – what was client trying to gain?

Possible questions

- What are the most important things for you to achieve in your life?

- What drives you? Gets you out of bed in the morning?

- What do you do on a day to day or regular basis to achieve these goals?

- Are some goals more important to you than others? Which ones, and why?

- Where would you like to be with respect to these goals in one year's time? Five years' time? Ten years' time?

Deeper

- What's missing from your life that you wish were there?

- How many people deeply accept you for who you are?

  - Would you like more?

- What are you longing for in your life?

- Who are you longing for?

Life: Health and Survival

Why that number and not a lower one?

What would it take for you to score higher?
Mission Critical:

- In answering those questions, what external pressures did you feel?

- Do we answer these questions for our clients? On their behalf? For their "own good"?

- Or do we explore, collaborate, evoke what is important/meaningful for them?

Case Formulation

- Integrates information collected during assessment to provide a comprehensive explanation (or set of hypotheses) for the client's presenting problems/offending

- Attempts to account for the client's current problems, how they developed and how they are maintained. Why these problems and why now?

- Adjusted as new information /understanding comes to light

What is the sum?

Case Formulation

GOOD LIVES MODEL

Other relevant theories, may include:
- Pathways model (Ward & Siegert, 2002)
- Self-Regulation model (Ward & Hudson, 1998)

Biopsychosocial explanation of predisposing, precipitating, perpetuating and protective factors

Formulation feedback

- Ask for permission to share your working formulation with the client
  - *Am I understanding you?*
  - *What am I missing?*

Feedback
is the
breakfast
of
champions.

~ Kenneth H. Blanchard ~

PSI
seminars

Intervention Planning

- Informed by case formulation
  - Relationship between offending, dynamic risk factors, protective factors, pursuit of common life goals
- Intervention plans provide roadmap for working toward dual aims of treatment
  - Enhanced well-being, reduced risk
- Intervention plans form basis of future-oriented good life plans
  - Dynamic, refined as treatment progresses, clients build strengths, develop skills to achieve common life goals in pro-social ways

Intervention Planning

- Intervention planning = collaborative

    - Therapist links client goals with treatment goals

- Individualised plans constructed for each client

    - Revolve around goal attainment, increasing protection, reducing risk

    - Set out valued common life goals, how clients plan to attain them

    - Attend to internal and external conditions necessary to attain goals

        - This also targets risk factors

E.g., Willis et al. (2013); Yates et al. (2010)

Treatment Content

- Treatment intensity and targets based on risk and needs

- Goals of each stage framed using approach (rather than avoidant) goals

- Programming linked to fulfilment of common life goals
  - Consider SMART-goal framework

Risk-based treatment components and related GLM constructs

Autobiography → Good Life Plan (past and present)

Offense Progression → Knowledge, Good Life Plan (past and present)

Cognition/Problem-Solving → Knowledge, Personal Choice & Independence, Peace of Mind, Relationships & Friendships

Relationships/ Intimacy Deficits → Relationships & Friendships, Community

Sexual Self-Regulation → Happiness, Peace of Mind, Relationships & Friendships, ++

General Self-Regulation → Peace of Mind, Personal Choice & Independence, ++

Emotion Regulation → Peace of Mind, Personal Choice & Independence, ++

Relapse Prevention Plan → Integrated Good Lives and Risk Management Plan (present and future-oriented)

Treatment Components
(Yates et al., 2010)

- Relevant personal history
  - Good life plan(s)
    - Valued primary goods, associated secondary goods
    - Obstacles attaining primary goods
    - NOT "autobiography"
  - Purpose:
    - Examine strengths
    - Examine/confirm GL goals
    - Examine/confirm risk and protective factors
    - Facilitate comfort with disclosure in treatment

Treatment Components
(Yates et al., 2010)

- Understanding the offense process
  - Understand role of primary human goods, secondary goods (means), obstacles
  - Determine primary goods at all stages of offense process
  - Focus = what individual was trying to gain
    - Did pre-offense behavior and offending represent opportunities to meet, keep, or re-acquire primary gods?
    - After offending, were goals achieved?
    - How does offense fit into good life plan?

Integrated Good Lives and Risk Management Plan (Yates et al., 2010)

- Includes all goods important to individual
  - Sufficient scope
- Includes nonoffending, practical ways to attain goods
  - Build on client strengths
  - Approach-oriented SMART goals
- Identifies threats/obstacles to goods attainment and strategies for managing
- Includes risk management plan

GLP Template Example

PAUL'S GOOD LIFE PLAN (POST-TREATMENT)					
Primary Good	**Good Life Goals (How I will meet this goal)**	**How I and others will know I am meeting this goal**	**Possible obstacles I will need to manage**	**Signs I need help (how I and others will know)**	**Overcoming obstacles**
Relationships/Friendships	*Maintain the relationships I have with my family and friends*	*Weekly family dinners, participating in fortnightly hikes, having friends over for dinner/games nights*	*Re-activation of thoughts that I will be judged or rejected, especially if I were to meet a potential partner*	*Physical and emotional withdrawal from family and friends*	*Recognise in advance when I am at risk of withdrawing, e.g., at times of stress. Remind myself that I have supportive people around me who don't judge me, including my sister and online support group. Surround myself with those people who accept me for me.*
Complete table for all primary goods important to the client.					

Contrast: A relapse-prevention oriented risk management plan

- Avoid being in areas that children congregate (e.g., outside schools, parks)

- Avoid any media (e.g., magazines, television) depicting prepubescent girls

- Do not join church or other community groups in which children are present

- Avoid isolating especially when experiencing low mood

- Constantly monitor environment for new high risk situations/warning signs

- Phone a nominated support person in event of warning signs (loneliness, offense related arousal) or high risk situations which I cannot escape

Treatment Process

and Process Challenges

Treatment is something we do for and with clients, not to and on them

(Miller & Rollnick, 2013)

A quick review:
How does trauma and adversity affect development?

And Risk Factors?

And Good Lives Goals?

Developmental effects of childhood adversity

Attachment
- Trauma impacts child & caregiver relationship
- Impairs trust and ability to form secure attachments

Cognition
- Brain selectively focuses on maintaining safety rather than planning, learning, or future-oriented activities
- Expectations and Interpretations

Self-regulation
- Frontal lobe development is disrupted, can result in long-term effects on emotional and behavioral self-control

Cascade Effects
- Early deficits in one domain of functioning impede subsequent development in other areas

Levenson Willis
Prescott 2017

Developmental effects of childhood adversity and Risk

Attachment

- Intimacy deficits
- Dismissive or disorganized attachment style
- Negative peer/social influences
- Hostility towards women
- Emotional congruence with children

Cognition

- Attitudes and beliefs that support child abuse, criminality, violence against others
- Schemas/core beliefs: Dangerous world, children as sexual, women as unknowable

Self-regulation

- Coping style focusing on problems instead of solutions, focus on the emotions that problems generate, etc.
- General self-regulation, sexual self-regulation, etc.
- Can appear as ADHD, Conduct Disorder, etc.

Cascade Effects

- Early deficits in one domain of functioning impede subsequent development in other areas
- Risk factors as obstacles to achieving developmental tasks and – ultimately – Good Lives Goals.

Levenson
Prescott Willis
2017

Developmental effects of childhood adversity and Good Lives Goals

Attachment
- Relatedness, being connected to others
- Community, being part of a group
- Meaning and purpose in life, spirituality

Cognition
- Meaning & purpose, spirituality
- Knowledge
- Creativity/new experiences

Self-regulation
- Autonomy, independence, being my own person
- Creativity, happiness/pleasure, having fun
- Can appear as ADHD, Conduct Disorder, etc.

Cascade Effects
- Adverse experiences =>
- Challenges in development =>
- Obstacles to balanced, self-determined life =>
- Risk factors =>
- Barriers to good life

Levenson
Prescott Willis
2017

Ways trauma may impact relational dynamics

Hypervigiliant
Easily offended
Over reactive
Aggressive
Provocative

Healthy coping
Boundaries
Problem Solving Skills

engage

Fight

Face

repel

attract

Flight

Freeze

Avoid relationships
Avoid Intimacy
Self Medicate

dis-engage

Passive
Over compliant
Dependent
Can't set boundaries

The Importance of Narrative

CONSIDER …

Among the tasks of the mind is to reduce the difference between the prediction and the sensation

Application

"I went to the grocery store, and for the first time ever I knew what I wanted"

Analysis

- Trauma interferes with decision-making
- Trauma interferes with prediction of sensations
- Trauma interferes with prediction of happiness
- Trauma interferes with the belief that predictions and decisions are possible
- Trauma focuses on surviving threats in the moment
- Move beyond teaching how to make lists
- Move beyond decision-making skills

Reflection

1. *That's fantastic. There you were, able to focus on what you wanted and not on what others wanted from you.*

2. *Hey, that's great! In that moment, you were aware of the things that mattered most to you*

3. *Good for you. Staying focused on what matters to you in a busy place like a grocery store can be a real challenge.*

Application

"I can't tell you what I'm thinking. It's too confusing. I'm not sure you'd get it. Look, never mind."

Translation

- "Other people have always told me what to do.

- I've had to hide to avoid being beaten

- Now you're asking me to express my thoughts freely; that's dangerous

- I've learned not to trust my thoughts and feelings

- Survival has meant focusing outside myself

- My capacities to observe my thoughts and feelings have atrophied.

- It's safer to shut down."

Reflection

1. *Describing your experience is really hard.*

2. *It's really hard to talk about these things when you don't know if I'll really get it.*

3. *There's a bigger piece of all of this that I may not be seeing.*

4. *If you were to really talk about these things, you'd need to know that others will understand and respect you.*

Cultural Trauma

"What's it like to be working with a white guy like me?"

• Activation of cultural trauma can happen at the epigenetic level

• We forget how much power we have over clients

Possible reflections

- *You might be wondering if someone like me – who comes from outside your culture – can understand you and you have every right to be suspicious about all of this.*

- *With everything going on for you, including having to talk with a counselor who's not from your same culture(s), it's probably better if you don't completely trust me.*

- *At some point, if you'd be willing to talk with me about our cultural differences, I would be honored to listen and respond as best I can.*

How Well Am I Implementing the GLM (or other methods)?

GLM Fidelity Monitoring

Prescott & Willis (2021)

GLM Fidelity Monitoring Tool

Table 1

GLM Fidelity Monitoring Tool Overview

GLM Fidelity Monitoring Tool Section	Fidelity Indicator
1. Fundamental Considerations and Processes • Qualities of the therapist, as perceived by the client and others • Underlying "spirit" of treatment delivery • Prioritizing clinical skills that promote change • Actively and explicitly seeking client feedback	0 – 2 rating[a]
2. GLM-Specific Considerations and Processes • Focus on Good Life goals • Conceptualization of risk factors • Good Life goals implicated in offending • Obstacles to achieving one's Good Life plan	0 – 2 rating[a]
3. Client-Focused GLM Considerations • Ten questions exploring therapist's progress developing a GLM grounded case conceptualisation and therapy plan for individual clients	Extent to which each question can be answered

[a]0 = poor (or absent) fidelity, 1 = partial fidelity, 2 = fidelity

Motivational Interviewing Integrity Tool

Technical Components						
Cultivating Change Talk	1	2	3	4	5	Target Change:_____
Softening Sustain Talk	1	2	3	4	5	
Relational Components						
Partnership	1	2	3	4	5	
Empathy	1	2	3	4	5	

Behavior Counts

	Total	
Giving Information (GI)		
Persuade (Persuade)		
Persuade with Permission (Persuade with)		
Question (Q)		
Simple Reflection (SR)		
Complex Reflection (CR)		
Affirm (AF)		
Seeking Collaboration (Seek)		
Emphasizing Autonomy (Emphasize)		
Confront (Confront)		

Cultivating Change Talk

1	2	3	4	5
Clinician shows no explicit attention to, or preference for, the client's language in favor of changing	Clinician sporadically attends to client language in favor of change – frequently misses opportunities to encourage change talk	Clinician often attends to the client's language in favor of change, but misses some opportunities to encourage change talk	Clinician consistently attends to the client's language about change and makes efforts to encourage it	Clinician shows a marked and consistent effort to increase the depth, strength, or momentum of the client's language in favor of change

Softening Sustain Talk

1	2	3	4	5
Clinician consistently responds to the client's language in a manner that facilitates the frequency or depth of arguments in favor of the status quo.	Clinician usually chooses to explore, focus on, or respond to the client's language in favor of the status quo.	Clinician gives preference to the client's language in favor of the status quo, but may show some instances of shifting the focus away from sustain talk.	Clinician typically avoids an emphasis on client language favoring the status quo.	Clinician shows a marked and consistent effort to decrease the depth, strength, or momentum of the clients language in favor of the status quo.

Partnership

1	2	3	4	5
Clinician actively assumes the expert role for the majority of the interaction with the client. Collaboration or partnership is absent.	Clinician superficially responds to opportunities to collaborate.	Clinician incorporates client's contributions but does so in a lukewarm or erratic fashion.	Clinician fosters collaboration and power sharing so that client's contributions impact the session in ways that they otherwise would not.	Clinician actively fosters and encourages power sharing in the interaction in such a way that client's contributions substantially influence the nature of the session.

Empathy

1	2	3	4	5
Clinician gives little or no attention to the client's perspective.	Clinician makes sporadic efforts to explore the client's perspective. Clinician's understanding may be inaccurate or may detract from the client's true meaning.	Clinician is actively trying to understand the client's perspective, with modest success.	Clinician makes active and repeated efforts to understand the client's point of view. Shows evidence of accurate understanding of the client's worldview, although mostly limited to explicit content.	Clinician shows evidence of deep understanding of client's point of view, not just for what has been explicitly stated but what the client means but has not yet said.

Outcome Rating Scale

Looking back over the last week, including today, help us understand how you have been feeling by rating how well you have been doing in the following areas of your life, where marks to the left represent low levels and marks to the right indicate high levels. *If you are filling out this form for another person, please fill out according to how you think he or she is doing.*
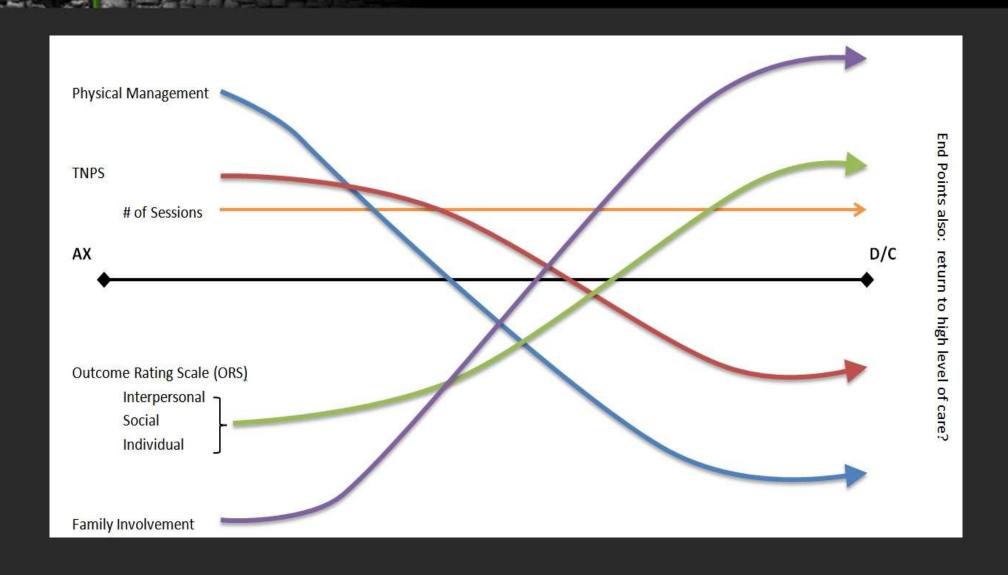

Individually
(Personal well-being)

|---|

Interpersonally
(Family, close relationships)

|---|

Socially
(Work, school, friendships)

|---|

Overall
(General sense of well-being)

|---|

Session Rating Scale

Please rate today's session by placing a mark on the line nearest to the description that best fits your experience:

Relationship

I did not feel heard, understood, and respected

|---|

I felt heard, understood, and respected

Goals and Topics

We did not work on or talk about what I wanted to work on or talk about

|---|

We worked on and talked about what I wanted to work on and talk about

Approach or Method

The therapist's approach is not a good fit for me

|---|

The therapist's approach is a good fit for me

Overall

There was something missing in the session today

|---|

Overall, today's session was right for me

(Miller, Duncan, & Johnson, 2002)

Welcome to My World

Looking Beyond

To Be Continued...

...*by you!*
