

**PEOPLE WHO SEXUALLY ABUSE:  
WHAT YOU NEED TO KNOW**

David S. Prescott  
2023

Welcome!

1

---

---

---

---

---

---

---

---

**CONTACT**

- David S. Prescott
- Director, Safer Society Continuing Education Center
- davidprescottvt@gmail.com
- www.saferociety.org

2

---

---

---

---

---

---

---

---

**PLEASE BE PATIENT WITH ME**

- We live in troubled times
- I am going to be very provocative
- I am going to be highly irreverent
- This is presentation aimed at professionals
- I come in peace and believe in human dignity
- I mean no harm
- Please take everything I say in the spirit in which it is intended

3

---

---

---

---

---

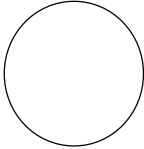

---

---

---

**TAKE HOME MESSAGES**

- What you do matters
- What you do works
- Follow the research
- Beware of false advertising
- Always keep the big picture in mind

4

4

---

---

---

---

---

---

---

---

**FOCUS**

- Overview
- Where we are and how we got here
- People who are victimized
- Assessment
- Treatment
- Supervision
- Special Issues

5

5

---

---

---

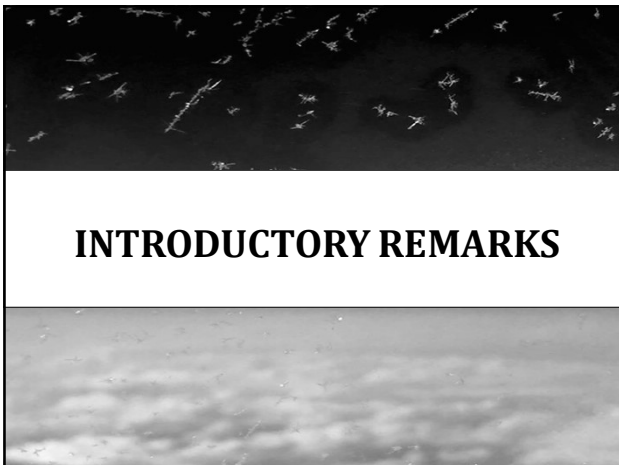

---

---

---

---

---

**INTRODUCTORY REMARKS**

6

---

---

---

---

---

---

---

---

### TAKE-HOME MESSAGE

- Abuse is abuse
  - No one "asks" to be abused
- Not all who abuse are the same
- Punishment-only responses don't reduce risk
- The right treatment can work
- The right treatment with the right community supervision can work better.

7

7

---

---

---

---

---

---

---

---

### WHERE WE ARE AND HOW WE GOT HERE

8

---

---

---

---

---

---

---

---

### GOT DATA?

- The need for evidence

9

9

---

---

---

---

---

---

---

---

**HOW DID WE GET HERE?**

- Quick look backwards
- Retrospective bias
- Great respect for all involved
- Intent: Tough on issues, tender on people

*- People are not now as smart as they think; people used to be smarter than we now think they were*  
(Quinsey, Harris, Rice, & Cormier, 2006)

10

---

---

---

---

---

---

---

---

**HISTORICAL OVERVIEW**

- 1895-1985

11

---

---

---

---

---

---

---

---

**MY CONCERN**

- During the past 40+ years, the majority of our progress has been technological

12

---

---

---

---

---

---

---

---

13

---

---

---

---

---

---

---

---

14

---

---

---

---

---

---

---

---

*Speech is a mirror of the soul: as a person speaks, so is s/he*

- Publilius Syrus, 100 BC

15

---

---

---

---

---

---

---

---

### 17TH CENTURY: PASCAL'S PENSEES

“People are generally better persuaded by the reasons which they have themselves discovered, than by those which have come into the mind of others.”

16

---

---

---

---

---

---

---

---

17

---

---

---

---

---

---

---

---

18

---

---

---

---

---

---

---

---

19

---

---

---

---

---

---

---

---

### TREATMENT CONTEXT: WHAT WORKS?

*"I am bound to say that these data, involving over 200 studies and hundreds of thousands of individuals as they do, are the best available and give us very little reason to hope that we have in fact the sure way of relief or recovery through rehabilitation."* (Criswell, 1974, p. 49)

20

---

---

---

---

---

---

---

---

### 1979: EDWARD S. BORDIN

- Therapeutic alliance:
  - Agreement on relationship
  - Agreement on goals
  - Agreement on tasks
  - (Norcross, 2002, would add client preferences)
- Over 1,100 studies have emphasized the importance of the alliance in psychotherapy since (Miller, 2011)

21

---

---

---

---

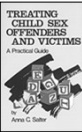

---

---

---

---

**Salter, 1988 (p. 93)**

- (T)he process of treating child sex offenders is heavily weighted in the direction of confrontation. Treatment requires continual confrontation.
- *No I don't trust you and you would be pretty foolish to trust yourself.*
- *Give me a break. What do you mean one drink can't do any harm?*
- However, later says that treatment should not be hostile. How do we reconcile this?

22

---

---

---

---

---

---

---

---

**1989:  
PAUL GENDREAU**

- "Something works"
- "What works!"

23

---

---

---

---

---

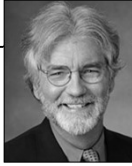

---

---

---

**HOPE THEORY, 1999**

- C.R. "Rick" Snyder:
  - Agency Thinking
    - Awareness that a goal is attainable
  - Pathways Thinking
    - Awareness of how to do it
- *"Therapists who are burned out or otherwise fail to convey hopefulness model low agency and pathways thinking." (in Hubble, Duncan, & Miller, 1999)*

24

---

---

---

---

---

---

---

---

### PARHAR, WORMMITH, ET AL., 2008

- Meta-analysis of 129 studies
- *In general, mandated treatment was found to be ineffective ... particularly when the treatment was located in custodial settings, whereas voluntary treatment produced significant treatment effect sizes regardless of setting.*

25

---

---

---

---

---

---

---

---

---

### TREATMENT CONTEXT: WHAT WORKS?

---

---

---

---

---

---

---

---

---

---

28

### GANNON ET AL. (2019) KEY FINDINGS

- Treatment associated with 32.6% reduction in sexual reoffending (9.5% treated, 14.1% untreated)
- Sexual offense specific treatment programs best when
  - Consistent input from registered psychologists (vs. inconsistently present, not present or unknown)
  - Supervision provided (vs. absent or unknown); better effects when provided by highly trained, licensed professionals
  - Incorporation of some form of arousal reconditioning (vs. none or unknown)
  - No reliance on polygraph

**ELIZABETH LETOURNEAU**  
**WASHINGTON POST**  
**NOVEMBER 2022**

The Nov. 18 Metro article "Md. court filing tallies sex abuse by clergy" noted that Maryland Attorney General Brian E. Frosh's (D) court filing comes in the 20th-anniversary year of an investigative series by the Boston Globe that dug into the Catholic sexual abuse scandal in the United States.

[Sign up for a weekly roundup of thought-provoking ideas and debates](#) →

Over the past two decades, a grand jury in Pennsylvania issued a report alleging that more than 300 priests in six dioceses abused 1,000 children over seven decades. And we've seen high-profile sexual abuse cases at Michigan State University, USA Gymnastics and Penn State.

We're still waiting until kids are harmed to respond. For more than 30 years, we've relied almost solely on after-the-fact approaches to address child sexual abuse. In this same time, we made major inroads in the prevention of child physical abuse, child neglect, bullying and adolescent suicide. We have dozens of evidence-based, effective prevention interventions for these types of childhood victimizations. We need the same for child sexual abuse. Child sexual abuse is a preventable public health problem. Until our nation puts serious resources into the development, evaluation and dissemination of prevention efforts, we will stay trapped in a cycle of abuse, outrage and disbelief.

*Elizabeth J. Letourneau, Baltimore*

*The writer is director of the Moore Center for the Prevention of Child Sexual Abuse at the Johns Hopkins Bloomberg School of Public Health*

31

---

---

---

---

---

---

---

---

---

---

---

---

**IMPORTANT**

- Letourneau focuses on the clergy
- 2021 saw the same with the police in the UK
  - Aftermath of Sarah Everard
- Cases are pending against beloved sports officials
- Abuse is in all of our communities
  - And often our own families
  - And both sides of the political aisle

---

---

---

---

**NOW**

- We know better
- We do worse

37

---

---

---

---

---

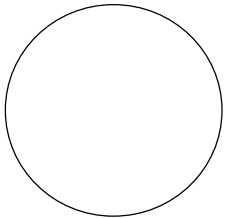

---

---

---

**WHAT'S OUR GOAL?**

- Stopping the behavior?
- Justice for the victim?
- Preventing re-offense?
- Building a better life?

38

---

---

---

---

---

---

---

---

**WHAT WORKS?**

- Do we want them to re-offend or not?
- What can we do?
- Who should we be?
- Is that enough?

39

---

---

---

---

---

---

---

**Vermont Assessment of Sex Offender Risk-2**

Name _____	DOB _____	Age _____	Race _____	Date _____
------------	-----------	-----------	------------	------------

**Reoffense Risk Scale**

1. Age at Conviction (Maximum 30 to 34 = 2, 35 to 39 = 1, 40 or older = 0)
2. Prior Sex Offense Convictions (none = 0, one = 1, two or more = 2)
3. Prior Sex Offense Category (Sexual Assault = 1, Rape = 2, Sexual Abuse = 1, Child Abuse = 1, Other = 0)
4. Any Violations of Probation, Parole or Other Release Conditions During Past Five Years (0 = 0, 1 = 1, 2 or more = 2)
5. Any Convictions for Non-Criminal Sex Offenses (0 = 0, 1 = 1)
6. Any Child Victims (0 = 0, 1 = 1)
7. Relationship to Victim (lived with for 18 days or more prior to offense = 0, occasional visitor or acquaintance = 1, stranger = 2)
8. Offense Related Actual Victim (only victim and family of conviction; not approximate victim; community = 0, acquaintance = 1, family = 2, intimate partner = 3, spouse = 4)
9. Victim Known Before Past Five Years in Community (acquainted = 0, knew legal or illegal partner = 1, within 50 days before = 2)
10. Victim Younger Than Past Five Year (offense) (0 = 0, 1 = 1, 2 = 2)
11. Time Expired or in Release During Past Five Years (0 = 0, 1 = 1, 2 = 2)
12. Sex Offender Treatment History (none = 0, partial during or after an offense = 1, full during or after an offense = 2, no conviction for index sex offense, minimal treatment, and treatment ended at release = 0, "terminated" or "discontinued" = 1, 2 = 2)

**Total** \_\_\_\_\_

**Severity Factors Checklist**

1. Most Sexually Motivated Index Sex Offense
  - a. sex-related offense
  - b. sadistic
  - c. digital penetration, bodily or mutilation
  - d. sexual or attempted sexual penetration or rape
  - e. force
  - f. threat to retaliate behavior
2. Most Force Used During Index Sex Offense
  - a. no force/defense
  - b. minor offense
  - c. force greater than necessary to gain compliance or control
  - d. force that threatened death, victim or others
  - e. use of pointed, deadly weapon
3. Most Physical Harm to Index Sex Offense Victim
  - a. no medical treatment required
  - b. minor to require limited medical attention
  - c. required medical attention
  - d. hospitalized 24 hr
  - e. death resulting
4. Vulnerability Characteristics of the Index Offense Victim
  - a. victim age 17 or younger
  - b. victim age 65 or older
  - c. victim developmentally disabled
  - d. victim had chronic mental illness
  - e. victim had a vision/physical disability
  - f. victim had severe mental disability
  - g. none of the above

BERNARD WERBER

- Between what I think, what I want to say, what I believe I say, what I say, what you want to hear, what you believe to hear, what you hear, what you want to understand, what you think you understand, what you understand... They are ten possibilities that we might have some problem communicating. But let's try anyway...*

<https://www.azquotes.com/quote/802362>

51

---

---

---

---

---

---

---

---

---

---

---

---

**BY EXTENSION, FOR ASSESSMENTS**

- What I want to see >
- What I do see >
- What I think I see >
- What it means >
- What I want it to mean >
- What I believe it means
- What I want to report >
- What I think I report >
- What I do report >
- What others read >
- What others want to read >
- What they believe it says >
- What they want to decide>
- What they decide >
- What they tell themselves after they decide
- (15 points?)

52

---

---

---

---

---

---

---

---

52

**PERSONS WHO ARE VICTIMIZED**

53

---

---

---

---

---

---

---

---

**PERSONS WHO ARE VICTIMIZED**

- As many as 90% of persons reporting sexual victimization know the person who abused them
- 2/3 or more of known offenses occur in the person's own home
- As many as 90% of persons who are victimized fail to report their abuse to authorities or others in a position to help

54

---

---

---

---

---

---

---

---

## PERSONS WHO ARE VICTIMIZED

- No “profile” of people who are victimized
  - Dependence on the person who abuses is common
- Most do not report for a variety of reasons
- Sexual violence can have psychological, emotional, social and physical effects on a survivor.
- Looking sexy is not the same thing as wanting sex
- Alcohol “expectancies”
- The paradox of silence

55

55

---

---

---

---

---

---

---

---

---

---

## CAUTION

- Reactions to being abused can vary widely.
- Sexual abuse poses an unacceptable risk of harm.
  - The nature of harm is unpredictable
- Legal proceedings can themselves sometimes cause harm.

56

56

The screenshot shows a medRxiv preprint page. At the top, it features the medRxiv logo and the text 'THE PREPRINT SERVER FOR HEALTH SCIENCES'. The article title is 'Childhood maltreatment influences adult brain structure through its effects on immune, metabolic and psychosocial factors'. Below the title, the authors are listed: Sofia C. Ouellet, Richard A.J. Bullimore, Ian Simpson-Kerr, and Anne-Laure van Harmelen. The article is dated June 24, 2023. A prominent warning states: 'This article is a preprint and has not been peer-reviewed [what does this mean?]. It reports new medical research that has yet to be evaluated and so should not be used to guide clinical practice.' The abstract begins with 'Childhood maltreatment (CM) leads to a lifelong susceptibility to mental ill-health which might be reflected by its effects on adult brain structure, perhaps indirectly mediated by its effects on adult metabolic, immune, and psychosocial systems. Indexing these systemic factors via body mass index (BMI), C-reactive protein (CRP) and rates of adult trauma (AT), respectively, we tested three hypotheses: (H1) CM has direct or indirect causal effects on adult trauma, BMI and CRP; (H2) adult trauma, BMI and CRP are all independently related to adult brain structure; and (H3) effects of CM on adult brain structure are mediated by its effects on adult trauma, BMI and CRP. Using path analysis and data from 110,887 participants in UK Biobank we find that CM is related to greater BMI and AT levels, and that only these two variables mediate CM's effects on CRP (H1). Regression analyses on the UKB MRI subsample (n=21,738) revealed that greater CRP and BMI were both related to a spatially convergent pattern of cortical effects (Spaanman's and ST) characterized by fronto-occipital increases and temporo-parietal reductions in thickness, and that AT is related to lower subcortical volumes (H2). Finally, path models indicated that CM has indirect effects in a subset of brain regions through its influence on BMI, CRP and AT (H3). Results provide evidence that childhood maltreatment can influence brain structure decades after exposure by increasing individual risk towards adult trauma, obesity or inflammation.'

On the right side of the screenshot, there are navigation options: 'HOME | SUPPORT | FAQ | BLOG | ALERTS | RSS | ABOUT', a search bar, and a list of actions: 'Download PDF', 'Print/Save Options', 'Author Contact', 'Supplementary Material', and 'Share/Link'. Below this, there is a section for 'COVID-19 SARS-CoV-2 preprints from medRxiv and bioRxiv' and a 'Subject Area' dropdown menu currently set to 'Psychiatry and Clinical Psychology'. At the bottom right, the page number '57' is visible.

ORIGINAL PAPER

**From surviving to thriving: factors associated with complete mental health among childhood sexual abuse survivors**

Esme Fuller-Thomson<sup>1</sup> · Ashley Lacombe-Duncan<sup>2</sup> · Deborah Goodman<sup>1</sup> · Barbara Fallon<sup>1</sup> · Sarah Brennenstuhl<sup>4</sup>

Received: 15 April 2019 / Accepted: 3 September 2019

**Abstract**  
**Background** Despite many negative health and social consequences of childhood sexual abuse (CSA), some of those with a history of adversity manage to thrive in adulthood and achieve complete mental health (CMH). CMH is defined as the absence of mental illness in combination with almost daily happiness and/or life satisfaction, as well as high levels of social and psychological well-being. The objectives of this study were (1) to identify the pathways linking CSA to CMH in adulthood and (2) to estimate the magnitude of risk and protective factors associated with CMH among those exposed to CSA.  
**Methods** A sample of 17,014 respondents aged 20 years and older from the 2012 Canadian Community Health Survey-Mental Health was selected including 651 with a history of CSA. Path analysis was used to estimate indirect and direct pathways between CSA, a priori hypothesized risk and protective factors, and CMH. Multivariable logistic regression was then used to investigate the magnitude of effects of the same risk and protective factors on CMH among CSA survivors.  
**Results** After controlling for age, sex, race, education, and marital status, the association between CSA and CMH was mediated by lifetime depression, anxiety, substance abuse, chronic pain, and having a confidant. The strongest predictor of past-year CMH among those with a history of CSA was lifetime depression (OR 0.12, 95% CI 0.07–0.20) followed by having a confidant (OR 6.78, 95% CI 1.89–24.38). The odds of CMH was decreased by over three times among those with a history of substance misuse, and halved for those with lifetime anxiety and/or presence of pain.  
**Conclusions** These findings suggest that CMH among survivors of CSA is related to social and emotional factors such as social support and lifetime history of mental health conditions. Future research should investigate the effectiveness of multi-level interventions for promoting recovery among CSA survivors.

---

---

---

---

---

---

---

**OVERVIEW**

59

---

---

---

---

---

---

---

---

---

---

---

---

**THE PROBLEM**

- Smith, Goggin, & Gendreau, 2002
- Meta-analysis
- 117 studies since 1958
- 442,471 criminal offenders, including juveniles

60

60

---

---

---

---

---

---

---

---

---

---

---

---

- No form of punishment reduces risk to abuse

61

61

---

---

---

---

---

---

---

---

**A REAL PROBLEM**

- *Prisons and intermediate sanctions should not be used with the expectation of reducing criminal behavior.*
  - Includes intensive surveillance, electronic monitoring, DARE, Scared Straight, etc.
  - Some indication of increased risk for low-risk criminals
  - While incarceration serves a purpose, we must be clear about what it does and doesn't do

62

62

---

---

---

---

---

---

---

---

**MANY MOTIVATIONS**

• Sexual

• Non-sexual

63

63

---

---

---

---

---

---

---

---

### 1980'S: WHAT MANY THOUGHT

- Sex offenders are destined to a lifetime of destruction and havoc
- Problem: prospective versus retrospective studies

64

---

---

---

---

---

---

---

---

### WHAT WE KNOW

- A range of contact and no-contact offenses
  - including sexual assault, online solicitation, making a distributing sexual abuse images (child porn)
- Greatly under reported
- Like sex offenses, offenders are not all alike; they have unique risks and strengths
- Only about half of child molesters meet criteria for Pedophilic Disorder.
  - Behavior not always the same as a sustained interest

65

65

---

---

---

---

---

---

---

---

### WHAT WE KNOW

- Many offenses are pleaded down
  - important to get a more accurate view of what occurred from available reports
- Not all sex offenders need intensive supervision
- May not have the typical criminal profile as other offenders but this does not mean they are not risky.

66

66

---

---

---

---

---

---

---

---

### HANSON AND BUSSIÈRE

- Meta-analysis, 1996, 1998
  - Asked: *"Compared to other sex offenders, which individual characteristics increase or decrease their chances of recidivism over the long term?"*
  - 61 data sets
  - examined 28,972 sex offenders

67

---

---

---

---

---

---

---

---

### HANSON AND BUSSIÈRE

- Measured outcomes:
  - sexual
  - non-sexual
  - general
 used re-arrests, reconviction, self-report, etc.
- No single factor found that could be used in isolation

68

---

---

---

---

---

---

---

---

### HANSON AND BUSSIÈRE

- Results:
  - 13.4% Sexual recidivism in 4-5 years (n = 23,393)
    - 18.9% for 1,839 rapists
    - 12.7% for 9,603 child molesters
  - 12.2% Violent recidivism in 4-5 years (n = 7,155)
    - 22.1% for 782 rapists
    - 9.9% for 1,774 child molesters
  - 36.3% any recidivism in 4-5 years (n = 19,374)
    - 46.2% for 4,017 rapists
    - 36.9% for 3,363 child molesters

69

---

---

---

---

---

---

---

---

**HANSON AND BUSSIÈRE**

- Predictors of sexual recidivism:
  - PPG sexual interest in children     $r = .32$
  - Any deviant sexual preference     $r = .22$
  - Prior sexual offenses     $r = .19$
  - Stranger victims     $r = .15$
  - Early onset     $r = .12$
  - Unrelated victims     $r = .11$
  - Boy victims     $r = .11$

70

---

---

---

---

---

---

---

---

**HANSON AND BUSSIÈRE**

- Predictors of sexual recidivism *(continued)*
  - Diverse sexual crimes     $r = .10$
  - Antisocial Personality Disorder     $r = .14$
  - Any prior offenses (general)     $r = .13$
  - Age (young)     $r = .13$
  - Single (never married)     $r = .11$
  - Treatment drop-out     $r = .17$

71

---

---

---

---

---

---

---

---

**HANSON AND BUSSIÈRE**

- What DIDN'T correlate to recidivism?
- History of sexual abuse
  - General psychological problems
  - Education
  - Victim empathy
  - Denial (without outlier)

### SEXUAL RECIDIVISM AT 5 YEARS (STATIC-99 SURVIVAL ANALYSIS)

76

---

---

---

---

---

---

---

---

---

---

### 5-YEAR SURVIVAL RATES: HANSON ET AL. 2015

77

---

---

---

---

---

---

---

---

---

---

### ASSESSMENT

78

---

---

---

---

---

---

---

---

---

---

**ASSESSMENT**

- Comprehensive assessment versus risk assessment.
  - Traditional assessment tools do not focus on specific risk factors
  - Risk assessments should use empirically supported tools (e.g., Static-99r, Stable 2007, Acute 2007)
- Best when done after guilt phase and prior to sentencing
  - to inform the court about supervision and treatment planning and orders

79

79

---

---

---

---

---

---

---

---

**ASSESSMENT**

- Some assessments are clinical
  - (e.g., psychophysiological measures)
- Some are designed to be done by trained probation/parole officers

80

80

---

---

---

---

---

---

---

---

**ASSESSMENT MEASURES**

- For use by PO's and Psychologists alike:
- Level of Service Inventory - Revised
  - Static-99r (actuarial, similar to life insurance tables)
  - Stable-2007 and Acute-2007
  - SOTIPS (Sex Offender Treatment Intervention Progress Scale)

81

81

---

---

---

---

---

---

---

---

**DYNAMIC RISK FACTORS**

- Deviant sexual interest/preference
- Antisocial orientation
- Significant social influences
- Intimacy deficits
- Sexual self-regulation
- Offense-supportive attitudes
- Cooperation with supervision
- General self-regulation

82

---

---

---

---

---

---

---

---

83

---

---

---

---

---

---

---

---

**TREATMENT**

- People who complete treatment programs re-offend at lower rates
  - 32% reduction in the most recent/rigorous study
- Are they cured?
  - "Cure" is misleading
  - Rehabilitated/treated may be better words to use

84

84

---

---

---

---

---

---

---

---

**TREATMENT**

- What courts / parole offices can do to support treatment
  - "Your behavior is going to determine how this goes."
  - Clear boundaries
- Differs from client-centered therapy
- Regular, on-going information sharing between the treatment providers and the supervision agents is critical

85

85

---

---

---

---

---

---

---

---

**TREATMENT OF PEOPLE WHO HAVE ABUSED**

- Cognitive-behavioral:
  - Change thought patterns and behavior
  - Development of pro-social/non-offending attitudes and beliefs
- Builds skills for managing risks
- Best over-arching goal: A balanced, self-determined lifestyle

86

---

---

---

---

---

---

---

---

**ANDREWS & BONTA (2010)**

Three Principles:

- Risk
- Need
- Responsivity

From *The Psychology of Criminal Conduct*, 5<sup>th</sup> ed.

87

---

---

---

---

---

---

---

---

**ANDREWS & BONTA - "BIG 4"**

- Antisocial values and attitudes
- Antisocial behavior
- Antisocial personality structure
- Antisocial peer affiliation

88

---

---

---

---

---

---

---

---

**EFFECTIVE PROGRAMS**

**RISK Principle**

- effective programs match the level of treatment intensity to the level of risk posed by the offender
- high risk = high intensity
- mismatching can result in increased risk

89

---

---

---

---

---

---

---

---

**RISK**

Environmental/Situational Elements

+ Personal Elements

Risk

90

---

---

---

---

---

---

---

---

**EFFECTIVE PROGRAMS**

**NEED Principle**

- effective programs target identified criminogenic needs
- sexual offenders require treatment programming individualized and specific to their needs
- other programs may result in some ancillary gain, but risk for sexual recidivism likely will not be reduced

91

---

---

---

---

---

---

---

---

**STABLE-2007**

<p>1. Significant Social Influences</p> <p>2. Intimacy Deficits</p> <ul style="list-style-type: none"> <li>- Lovers and intimate partners</li> <li>- Emotional identification with children</li> <li>- Hostility towards women</li> <li>- General social rejection/loneliness</li> <li>- Lack of concern for others</li> </ul>	<p>3. Sexual Self-Regulation</p> <ul style="list-style-type: none"> <li>- Sexual drive/pre-occupation</li> <li>- Sex as coping</li> <li>- Deviant sexual interest</li> </ul> <p>4. General Self-Regulation</p> <ul style="list-style-type: none"> <li>- Impulsive acts</li> <li>- Poor cognitive problem solving</li> <li>- Negative emotionality/hostility</li> </ul> <p>5. Cooperation with Supervision</p>
--	---

92

---

---

---

---

---

---

---

---

**EFFECTIVE PROGRAMS**

**RESPONSIVITY principle**

- effective programs are those which are responsive to offender characteristics
  - cognitive abilities
  - maturity
  - motivation
  - mode of intervention
  - scheduling concerns

93

---

---

---

---

---

---

---

---

## RELATIONSHIP PROBLEMS

94

---

---

---

---

---

---

---

---

## LEARNING DIFFICULTIES

95

---

---

---

---

---

---

---

---

## HYPERACTIVITY

96

---

---

---

---

---

---

---

---

### COMMUNICATION DIFFICULTIES

97

---

---

---

---

---

---

---

---

### PARADOXICAL COMMUNICATION

- ❖ You need to be more motivated to change.
- ❖ Treatment holds the promise of a “good life”.
- ❖ It is our job to point out your thinking errors; however, it is not acceptable for you to observe when we are using thinking errors.
- ❖ We expect you to demonstrate meaningful and consistent behavioral change within a highly controlled environment.
- ❖ You need to participate fully in treatment regimens that we professionals cannot agree on ourselves.

98

---

---

---

---

---

---

---

---

### COGNITIVE RIGIDITY

99

---

---

---

---

---

---

---

---

## AMBIVALENCE

- ❖ I want to work with you, and I don't want to sacrifice myself
- ❖ I want to change, and I want to be respected
- ❖ I want to be in treatment, and I don't want to be in a one-down position
- ❖ I want to look at myself, and I don't want to feel less of a man
- ❖ etc. etc. etc. etc. etc.

100

MARSHALL, 2005

101

101

---

---

---

---

---

---

---

---

MARSHALL, 2005

- Warm
- Empathic
- Rewarding
- Directive

Problem: Many people think they have these qualities, but don't

102

---

---

---

---

---

---

---

---

**WHAT NOT TO DO:  
CASE EXAMPLE**

103

---

---

---

---

---

---

---

---

**RULE REMINDERS**  
And Consequence earners

- No glass or ceramics in room
- No food or drinks in room
- ONE water per day: SIGN OUT and INITIAL bottle
- MUST ask before entering kitchen
- NO SEXUAL BEHAVIORS
- NO REVEALING CLOTHES Triple B \*NO butts, breasts, belly\*
- NO inappropriate behaviors
- 20 minutes @ the dinner table
- NO entering staff office without permission
- NO talking or hanging out in Hallways
- Lying
- Name Calling: peers or staff
- Slamming Doors
- Staff Spitting
- Tattling
- CANNOT be in a room with other peers WITHOUT STAFF
- Caught in a room with another resident and NO staff
- Taking food without permission
- NO dating/seeing other residents or their family members

• How far we have come...

104

---

---

---

---

---

---

---

---

- ONE person in the kitchen at a time
- Inappropriate table manners (eating with mouth open, etc.)
- NO borrowing, lending, buying or selling to any residents or staff
- SILENT Study Hall
- Chore Non-compliance
- NO talking behind peers back
- Worry about yourself and no one else
- No Pictures of other residents to be taken or kept on cameras
- No Swearing AT ALL- 10¢ a swear
- No Feet with shoes on the couch
- MUST wait 45 MINUTES after eating before using the bathroom
- NO note passing
- No mocking each other
- NO Threatening of any kind
- No more than \$20 in possession at any time
- Only fruit, cheese, or yogurt for evening snack

105

---

---

---

---

---

---

---

---

**These are and always have  
 been rules!**  
**This is a reminder and a prompt!**  
**These actions WILL BE  
 CONSEQUENCED**

106

---

---

---

---

---

---

---

---

107

---

---

---

---

---

---

---

---

**PROMISING TARGETS**

- changing antisocial attitudes and feelings
- reducing antisocial peer associations
- promoting prosocial associations
- increasing self-control, self-management, problem-solving skills
- reducing chemical dependencies
- shifting rewards for behavior from criminal to non-criminal orientation
- develop a plan to deal with risky situations
- confront personal barriers to change

108

---

---

---

---

---

---

---

---

**LESS PROMISING TARGETS**

- Increasing self-esteem for its own sake
- Focusing on vague personal complaints not related to criminal conduct
- Improving living conditions without touching on higher risk individuals and families
- Working on personal goals without providing concrete assistance
- Making the client a better person, when being a better person is unrelated to propensity for crime

109

---

---

---

---

---

---

---

**INDICATORS OF QUALITY PARTICIPATION**

- Attendance
- Engagement in program
- Completion (as opposed to premature program termination)
- Quality relationship with service provider
- Respect, positive attitude
- Showing change on the intermediate targets

110

---

---

---

---

---

---

---

**KEY COMPONENTS AND THE GOOD LIVES MODEL**

---

---

121

---

---

---

---

---

---

---

---

**THE GOOD LIVES MODEL (GLM)**

“...[our clients] want better lives, not simply the promise of less harmful ones”  
(Ward et al., 2006)

122

---

---

---

---

---

---

---

---

“As a kid I had lots of examples of what I didn’t want to be. I spent my life trying not to be those things. Then when an aide asked me about 5 years ago what I wanted to be I had no idea.”

40 y/o male  
in civil commitment (USA)

123

---

---

---

---

---

---

---

---

### REFLECTION EXERCISE

- Take three deep breaths. Take a moment to think about what a Good Life means to you.
- If it helps, close your eyes and think about what was happening the last time you remember feeling truly satisfied and fulfilled in your life. Try to *see* fulfilment. Try to *hear* fulfilment. Try to *taste* fulfilment. Try to *smell* fulfilment. Try to *feel* fulfilment.
- Take some notes.

*We will revisit this exercise later.  
You will not be expected to share your responses.*

---

---

---

---

---

---

---

---

124

### GOING UPSTREAM

- What is something (anything) that you would like right now?
  - World peace? A new phone? Maybe a drink?
  - If you had that, then what else would you have in your life?
  - And if you had that, what else would you have in your life?
  - And if you had that, what else would you have in your life?
  - Keep going until your answer is one word and you can't go further
  - What have you learned?

---

---

---

---

---

---

---

---

125

### WHAT ARE ALL THE NEEDS THAT THESE MEET?

---

---

---

---

---

---

---

---

126

**KRAKOW**

- Lord's Ark Church
- Built by hand from ruins caused by Soviet invasion
- What needs was this meeting?

127

---

---

---

---

---

---

---

---

**GLM APPROACH**

- Strengths-based, positive approach
- Collaborative, motivational approach
- Focuses on how treatment/supervision/case management will benefit client
- Two goals:
  - Reducing/managing risk
  - Attaining fulfilling life, psychological wellbeing
- GLM integrated with RNR

128

---

---

---

---

---

---

---

---

**GLM APPROACH**

- Offending relates to the pursuit of legitimate goals via harmful, maladaptive means
- All human beings are goal-directed and predisposed to seek *primary human goods*
- Primary human goods = actions, experiences, circumstances, states of being, etc., that individuals seek to attain for their own sake

129

---

---

---

---

---

---

---

---

<b>GLM APPROACH</b>
<ul style="list-style-type: none"> <li>• Secondary goods = concrete ways (means) to secure primary goods (also called instrumental goods)</li> <li>• Dynamic risk factors = markers for internal or external obstacles that block achieving primary goods in prosocial ways in addition to increasing risk</li> </ul>

130

---

---

---

---

---

---

---

---

<b>A NOTE ON NARRATIVE</b>
<ul style="list-style-type: none"> <li>• We often think in terms of risk and protective “factors”</li> <li>• Problem of reification</li> <li>• Ward and his colleagues (including us) encourage thinking in terms of the narrative that underlies the factors</li> <li>• What’s the actual story?</li> <li>• How did events result in this “factor”?</li> </ul>

131

---

---

---

---

---

---

---

---

<b>PRIMARY HUMAN GOODS</b>
<ul style="list-style-type: none"> <li>• GLM proposes at least 10 primary human goods</li> <li>• Value/importance placed on various goods determines individual’s conceptualisation of a “good life”; reflected in good life plan (GLP)</li> <li>• Assumption: Prosocial attainment of goods will help reduce or manage risk to reoffend (alongside targeting criminogenic needs)</li> </ul>

132

---

---

---

---

---

---

---

---

<b>PRIMARY HUMAN GOODS AS COMMON LIFE GOALS (YATES &amp; PRESCOTT, 2011)</b>	
<b>Primary Good</b>	<b>Common Life Goal</b>
Life	Life: Living and Surviving
Knowledge	Knowledge: Learning and Knowing
Excellence in Work & Play	Being Good at Work & Play
Excellence in Agency	Personal Choice and Independence
Inner Peace	Peace of Mind
Friendship/Relatedness	Relationships and Friendships
Community	Community: Being Part of a Group
Spirituality	Spirituality: Having Meaning in Life
Happiness	Happiness
Creativity	Creativity

133

---

---

---

---

---

---

---

---

---

---

<b>GLM VS. ANDREWS &amp; BONTA BIG 8 (POSSIBLE COMPARISON)</b>	
<b>GLM</b>	<b>Big 8</b>
<ul style="list-style-type: none"> <li>• Happiness/Pleasure</li> <li>• Creativity</li> <li>• Knowledge</li> <li>• Being good at work and play</li> <li>• Personal choice/independence</li> <li>• Relationships and friendships</li> <li>• Meaning and purpose in life</li> <li>• Peace of mind</li> <li>• Community</li> <li>• Living and surviving</li> </ul>	<ul style="list-style-type: none"> <li>• Substance abuse and other pleasure seeking</li> <li>• Poor performance in school or work</li> <li>• Impulsivity/self-regulation deficits</li> <li>• Antisocial peer group/social isolation/family problems</li> <li>• Antisocial history</li> <li>• Aggression/irritability</li> <li>• Attitudes and beliefs supportive of sexual violence</li> <li>• Alcohol/drugs, reckless, dangerous behavior</li> </ul>

134

---

---

---

---

---

---

---

---

---

---

<b>PRIMARY GOODS: DEFINITIONS</b>	
<ul style="list-style-type: none"> <li>• Life: Living &amp; Surviving                             <ul style="list-style-type: none"> <li>- Healthy living and functioning</li> <li>- Basic survival needs</li> </ul> </li> <li>• Instrumental (secondary) goods:                             <ul style="list-style-type: none"> <li>- Acquiring income for food/shelter</li> <li>- Physical activity</li> <li>- Healthy nutrition</li> <li>- Health care</li> </ul> </li> </ul>	

135

---

---

---

---

---

---

---

---

---

---

**PRIMARY GOODS: DEFINITIONS**

- Knowledge: Learning & Knowing
  - Desire for information and understanding about oneself and the world
- Instrumental (secondary) goods:
  - Attending school, training, vocational courses
  - Self-study
  - Therapy and self-help activities

136

---

---

---

---

---

---

---

---

**PRIMARY GOODS: DEFINITIONS**

- Being Good at Play / Being Good and Work
  - Mastery in work / leisure
- Instrumental (secondary) goods:
  - Participation in sport or other leisure activities/hobbies
  - Participation in training, certification, apprenticeships
  - Meaningful paid or voluntary work

137

---

---

---

---

---

---

---

---

**PRIMARY GOODS: DEFINITIONS**

- Personal Choice and Independence
  - Desire for independence, autonomy, choice, self-directedness
- Instrumental (secondary) goods:
  - Formulate plans to achieve a specific end or objective
  - Engage in activities to ensure self-sufficiency
  - Assert self; communicate needs and desires with others
  - Control, dominate, abuse or manipulate others to establish personal control

138

---

---

---

---

---

---

---

---

**PRIMARY GOODS: DEFINITIONS**

- Peace of Mind
  - Emotion regulation, equilibrium
  - Freedom from emotional turmoil and stress
- Instrumental (secondary) goods:
  - Activities to minimize emotional distress/achieve equilibrium (e.g., exercise, meditation)
  - Substance use or sexual activity to regulate mood/cope

139

---

---

---

---

---

---

---

---

**PRIMARY GOODS: DEFINITIONS**

- Relationships and Friendships
  - Desire to establish bonds with others; includes intimate, romantic and family relationships
- Instrumental (secondary) goods:
  - Activities that facilitate meeting new people and maintaining relationships
  - Spending time with friends
  - Giving and receiving support (e.g., emotional, practical)
  - Intimate relationships

140

---

---

---

---

---

---

---

---

**PRIMARY GOODS: DEFINITIONS**

- Community: Being Part of a Group
  - Desire to be connected to similar social groups
- Instrumental (secondary) goods:
  - Participate in community activities (e.g., social service groups, special interest groups)
  - Participate in volunteer activities, groups
  - Membership in groups sharing common interests, values, concerns
  - Provide practical assistance to others in times of need (e.g., neighbors)

141

---

---

---

---

---

---

---

---

**PRIMARY GOODS:  
DEFINITIONS**

- Spirituality: Having Meaning in Life
  - Desire for meaning and purpose in life
  - Sense that one is part of larger whole
- Instrumental (secondary) goods:
  - Attends formal religious/spiritual events (e.g., church)
  - Meditation/prayer
  - Involved in spiritual community/group
  - Mindfulness
  - Forest bathing

142

---

---

---

---

---

---

---

---

**PRIMARY GOODS:  
DEFINITIONS**

- Creativity
  - Desire for novelty or innovation
- Instrumental (secondary) goods:
  - Engages in new/novel experiences that has not attempted previously
  - Engages in artistic, creative activities
  - Desire/need for novel sexual practices

143

---

---

---

---

---

---

---

---

**PRIMARY GOODS:  
DEFINITIONS**

- Happiness
  - State of being happy/content
  - Pleasure in life
- Instrumental (secondary) goods:
  - Activities that result in sense of satisfaction, contentment, fulfillment
  - Activities that result in sense of pleasure (e.g., leisure activities, sports, sex)
  - Activities intended to achieve sense of purpose, direction in life (e.g., work, friendships, family)

144

---

---

---

---

---

---

---

---

145

---

---

---

---

---

---

---

---

**WHEN THINGS GO WRONG:  
GOOD LIFE PLAN OBSTACLES**

The GLM proposes that offending and life problems result when...

1. Maladaptive/harmful means used to seek out primary goods
2. A Good Life Plan lacks scope
3. Conflict between goods and/or means
4. Lack of capacity to attain goods in a prosocial/adaptive way (internal and external)

146

---

---

---

---

---

---

---

---

**A QUICK NOTE...**

- "Obstacles" are referred to in earlier texts as "flaws"
- "Flaws" can sometimes have a negative connotation ("flawed human being") even though the original intention was different (e.g., the flaws in leather or diamonds can give them their special character)
- English is a living language where connotations can change ☺
- "Obstacles" might just as easily be "challenges", although that word is also subject to misuse ("challenged by...")

147

---

---

---

---

---

---

---

---

**HARMFUL/PROBLEMATIC MEANS**

148

---

---

---

---

---

---

---

---

**NARROW SCOPE**

149

---

---

---

---

---

---

---

---

**CONFLICT: THE PURSUIT OF ONE GOOD INTERFERES WITH PURSUIT OF ANOTHER GOOD**

150

---

---

---

---

---

---

---

---

## LACK OF CAPACITY: INTERNAL

151

---

---

---

---

---

---

---

---

Adverse Childhood Experiences (ACEs) in the lives of adult males who have sexually offended (Levenson, Willis & Prescott, 2016)

ACE items:	SOTx (n = 679)	CDC males (n = 7,970)
Verbal abuse	53.3%	7.6%
Physical abuse	42.2%	29.9%
Child sexual abuse	38%	16%
Emotional neglect	37.6%	12.4%
Physical neglect	15.9%	10.7%
Parents not married	54.3%	21.8%
DV in home	24%	11.5%
Substance abuse in home	46.7%	23.8%
Mental illness in home	25.9%	14.8%
Incarceration family member	22.6%	4.1%

---

---

---

---

## LACK OF CAPACITY: INTERNAL

Maladaptive schemas	Maladaptive attachments	Maladaptive coping
<i>other people will abuse/reject/abandon me; dangerous world</i>	<i>relationship instability, hostility towards women, social rejection</i>	<i>substance abuse, sex as coping, aggression</i>

153

---

---

---

---

---

---

---

---

**LACK OF CAPACITY: EXTERNAL**

154

---

---

---

---

---

---

---

---

**IDENTIFYING OBSTACLES**

- What might have obstructed Paul from seeking valued primary goods in prosocial, adaptive ways?

155

---

---

---

---

---

---

---

---

**SPOT SOME OBSTACLES: PAUL**

*Paul is a 42-year-old male imprisoned for sexual offenses against female children (8 – 11 years-old). In each instance, Paul was a trusted babysitter (for his employer then neighbour). He described his offending in a romanticised fashion, stating that he was in relationships with each victim. He said that he “never hurt them” and that the sex was “entirely consensual.” Paul often took the victims away camping. He enjoyed teaching them about bush survival skills and different tree varieties. Paul enjoyed being surrounded by nature. He had few adult friends and stated that he preferred the company of children because they don’t judge him like adults do.*

156

---

---

---

---

---

---

---

---

**CASE ANALYSIS: PAUL**

<p>Primary goods implicated in offending:</p> <ul style="list-style-type: none"> <li>• Relationships &amp; Friendships</li> <li>• Knowledge</li> </ul> <p>Primary goods Important to Paul:</p> <ul style="list-style-type: none"> <li>• Relationships &amp; Friendships</li> <li>• ? Peace of mind</li> <li>• ? Spirituality</li> </ul>	<p>Obstacles in Good Life Plan:</p> <ul style="list-style-type: none"> <li>• Maladaptive means</li> <li>• Lack of capacity (internal)             <ul style="list-style-type: none"> <li>- Offense supportive cognitions (children as sexual objects)</li> <li>- Maladaptive attachments/relational styles (e.g. emotional congruence with children, general social rejection)</li> <li>- ?Offense related sexual interest</li> </ul> </li> </ul>

---

---

---

---

---

---

---

**TREATMENT PROGRESS**

158

---

---

---

---

---

---

---

---

**KEY CONSIDERATIONS**

- Is this person working with or against his supervising agent?
- Statements regarding wanting to, being able to, needing to change
- "Stages of Change"
  - Pre-contemplation
  - Contemplation
  - Preparation
  - Action
  - Maintenance

159

159

---

---

---

---

---

---

---

---

<p><b>PROTECTIVE FACTORS</b></p> <p>VRIES ROBBE ET AL. (2015)</p> <ul style="list-style-type: none"> <li>• Medication</li> <li>• Empathy</li> <li>• Secure attachment in childhood</li> <li>• Intimate relationship</li> <li>• Motivation for treatment</li> <li>• Attitude toward authority</li> <li>• Self-control</li> <li>• Coping skills</li> <li>• Work and leisure interests</li> </ul>
--

160

---

<p><b>VRIES ROBBE ET AL. (2015)</b></p>
<p><b>Best Outcomes:</b></p> <ul style="list-style-type: none"> <li>• Goal-directed living</li> <li>• Good problem-solving</li> <li>• Constructive employment/leisure activities</li> <li>• Sobriety</li> <li>• Hopeful, optimistic, motivated attitude towards desistance</li> </ul>

162

---

---

---

---

---

---

---

---

**WHEN ARE THEY FINISHED?**

- No magical formula
- Treatment versus Aftercare/Maintenance treatment
- Ask
  - Do others believe the offender has made significant progress?
  - Do others believe the offender has made acceptable progress?

163

163

---

---

---

---

---

---

---

---

**COMMUNITY SUPERVISION**

164

---

---

---

---

---

---

---

---

**MISSION CRITICAL**

- Close coordination between supervising agent and treatment provider(s)
- Supervising agent is the eyes and ears of the team in the community.

165

165

---

---

---

---

---

---

---

---

**IMPORTANT STUDY**

- Blasko & Taxman (2018)
- Offenders who believe their supervising agent is :
  - Fair
  - Respects them
  - Listens to them
- Have lower rates of violations and returns to prison
- The working relationship matters!

166

166

---

---

---

---

---

---

---

---

**MOST IMPORTANTLY**

- You don't have to be a therapist to be therapeutic!
- All professionals have a role in helping people become less dangerous.

167

167

---

---

---

---

---

---

---

---

**SUPERVISION**

- Community safety is the highest priority.
- Monitor victim access
- Observe offenders in the community, including their home and work.
- Look for positive or negative changes in problem solving and related behaviors.
- Identify and deal with non-compliance problems early.

168

168

---

---

---

---

---

---

---

---

**SUPERVISION**

- Address problem attitudes
- Provide support and acknowledge successes, even very small ones.
- Maintain frequent communication with other team members, such as the treatment provider, employer, spouse, et cetera.
- Support treatment compliance and extend probation if necessary to allow completion of treatment.
- Monitor compliance with registration and notification requirements.

169

169

---

---

---

---

---

---

---

---

**SUPERVISION**

- Monitor and help to strengthen the factors that stabilize the offender like housing and employment.
- Officers should remember that all people can change.
  - It is a process and takes time and support.
- Officers should remember they are not alone.
  - Most communities use a team approach to management

170

170

---

---

---

---

---

---

---

---

**SUPERVISION**

- Supervision and treatment are often tightly linked. More risk = more supervision.
  - The goal is to have the offender not need us to be watching them all the time.
- Specialized rules
  - Can include searching computers and devices
- Maintaining appropriate boundaries
  - supportive, respectful, professional
- Safety planning and community support teams

171

171

---

---

---

---

---

---

---

---

**SPECIAL ISSUES**

- Females
  - Re-offense rates of 1-5%
- Child Sexual Abuse Images
  - Not all have had contact offenses
- Juvenile-only
  - Young men who are prosecuted years after their offenses have often changed dramatically in a short time.

172

172

---

---

---

---

---

---

---

---

**THE SAFEST SEX OFFENDER**

- Stable
- Occupied
- Accountable to others
- Plans for the future
- Everything to lose by repeating past behavior

173

173

---

---

---

---

---

---

---

---

**TRAUMA-INFORMED CARE**

174

---

---

---

---

---

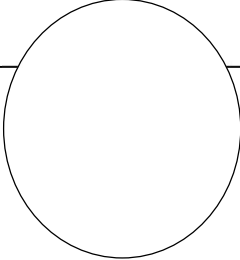

---

---

---

**WHAT IS TRAUMA?**

- PTSD
- Complex PTSD
- DEPNOS
- Complex trauma
- Developmental Trauma Disorder

175

---

---

---

---

---

---

---

---

175

176

---

---

---

---

---

---

---

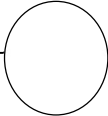

---

176

**WHAT IS TRAUMA?**

- Trauma is the desperate hope that the past was somehow different.

• -- Jan Hindman

177

---

---

---

---

---

---

---

---

177

### WHAT IS TRAUMA?

• APA:

• **Trauma** is an emotional response to a terrible event like an accident, rape or natural disaster. Immediately after the event, shock and denial are typical. Longer term reactions include unpredictable emotions, flashbacks, strained relationships and even physical symptoms like headaches or nausea. While these feelings are normal, some people have difficulty moving on with their lives. Psychologists can help these individuals find constructive ways of managing their emotions.

178

178

---

---

---

---

---

---

---

---

### ABSENCE OF CURIOSITY

180

---

---

---

---

---

---

---

---

**KEY THEME**

❖ Just notice

❖ See what happens next

- Not just mindful...
- Investigating each experience
- Practice Making Choices based on what you notice

181

---

---

---

---

---

---

---

---

182

---

---

---

---

---

---

---

---

The goal of (trauma) treatment is to help people live in the present, without feeling or behaving according to irrelevant demands belonging to the past

~Bessel van der Kolk

183

---

---

---

---

---

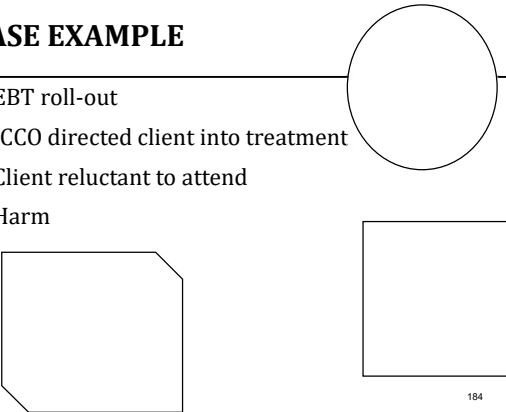

---

---

---

**CASE EXAMPLE**

- EBT roll-out
- JCCO directed client into treatment
- Client reluctant to attend
- Harm

184

184

---

---

---

---

---

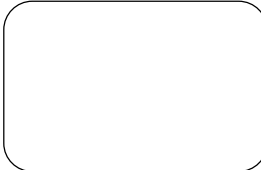

---

---

---

**BENISH, IMEL, & WAMPOLD, 2008**

- Treatment for PTSD is effective
- “Bona fide psychotherapies produce equivalent benefits for patients with PTSD”
- Much controversy

185

- Some treatments cause harm
- Lilienfeld (2007)

186

186

---

---

---

---

---

---

---

---

**ULTIMATELY**

*No intervention that takes power away from the survivor can possibly foster her recovery, no matter how much it appears to be in her immediate best interest.*

-- Judith Herman, M.D.

- Reframe: Interventions that empower survivors foster recovery

187

---

---

---

---

---

---

---

---

**POST-TRAUMATIC STRESS DISORDER**

188

---

---

---

---

---

---

---

---

**POST-TRAUMATIC STRESS DISORDER**

- Traumatic event including
  - Actual or threat of death or serious injury
  - Threat to physical integrity
  - Response of intense fear, helplessness, horror
- Persistent re-experiencing of events
- Persistent avoidance of associated stimuli & numbing of responsiveness
- Persistent symptoms of increased arousal
- Duration >1 month, significant disturbance in functioning

189

---

---

---

---

---

---

---

---

<b>POST-TRAUMATIC STRESS DISORDER</b>
<ul style="list-style-type: none"> <li>• Re-experiencing distress           <ul style="list-style-type: none"> <li>- Recollections, images, thoughts, perceptions</li> <li>- Dreams</li> <li>- Flashbacks, illusions, hallucinations</li> </ul> </li> <li>• Avoidance of related stimuli           <ul style="list-style-type: none"> <li>- Thoughts, feelings, conversations</li> <li>- Activities, places or people</li> </ul> </li> </ul>

190

---

---

---

---

---

---

---

---

<b>POST-TRAUMATIC STRESS DISORDER</b>
<ul style="list-style-type: none"> <li>• Numbing of general responsiveness           <ul style="list-style-type: none"> <li>- Inability to recall important aspects of event</li> <li>- Diminished interest/participation in activities</li> <li>- Detachment/estrangement from others</li> <li>- Restricted range of emotions (e.g., love)</li> <li>- Sense of foreshortened future</li> </ul> </li> <li>• Arousal symptoms           <ul style="list-style-type: none"> <li>- Insomnia, anger, hypervigilance, difficulty concentrating, exaggerated startle response</li> </ul> </li> </ul>

191

---

---

---

---

---

---

---

---

<b>POST-TRAUMATIC STRESS DISORDER</b>
<ul style="list-style-type: none"> <li>• Events           <ul style="list-style-type: none"> <li>- Military combat</li> <li>- Violent personal assault (physical, sexual, mugging)</li> <li>- Kidnapping, terrorism, torture, incarceration, disasters, auto accidents, terminal diagnosis)</li> <li>- Witnessing fatal accident, body parts</li> </ul> </li> <li>• Typically worse when event is of human design</li> <li>• Typically worse when stressor is repeated, chronic</li> </ul>

192

---

---

---

---

---

---

---

---

### IMPORTANT

- Not all trauma results in PTSD
- Trauma can have a devastating effect on life outside of PTSD

**Adverse Childhood Experiences in the Lives of Male Sex Offenders: Implications for Trauma-Informed Care**

Jill S. Levenson<sup>1</sup>, Gwendolyn M. Willis<sup>2</sup>, and David S. Prescott<sup>3</sup>

1University of North Carolina at Chapel Hill, 2University of North Carolina at Chapel Hill, 3University of North Carolina at Chapel Hill

**Abstract**  
This study explored the prevalence of childhood trauma in a sample of male sexual offenders (N = 479) using the Adverse Childhood Experiences (ACE) scale. Compared with males in the general population, sex offenders had more than 3 times the odds of child sexual abuse (CSA), nearly twice the odds of physical abuse, 13 times the odds of verbal abuse, and more than 4 times the odds of emotional neglect and coming from a broken home. Less than 10% endorsed four or more (high-risk) maltreatment experiences. Higher ACE scores were associated with household dysfunction, suggesting that many sex offenders were raised in a disordered social environment. Higher ACE scores were also associated with early adverse experiences. By enhancing our understanding of early adverse experiences, we can better design trauma-informed interventions that respond to the clinical needs of sex offender clients.

---

---

---

---

---

---

---

### COMMON TRAUMA RESPONSES

**Trauma**

- Intrusive memories
- Shame, self-hatred
- Panic attacks
- Emotional overwhelm
- Chronic pain, headaches
- Eating disorders
- Substance abuse
- Self-destructive behaviors
- Little or no memories
- Hypervigilance
- Depression
- Dissociation
- Irritability
- Loss of interest
- Numbing
- Insomnia
- Decreased concentration
- Hopelessness
- Nightmares, Flashbacks
- Startle response
